

Slack

The ONAP Slack instance is <https://onaproject.slack.com/>

The join link is <https://join.slack.com/t/onaproject/signup> It should permit most company & school domains known to be engaged with ONAP to join without difficulty.

Folks joining from a "general use" email domain like gmail, hotmail, qq, etc. will need to ask a peer to send them an invite.

Unfortunately there are is at least one vendor and a few carrier domains that Slack also throws into the "general use" category even though they have legit usage for employees within those companies.
