### S3P Improvements

Presented to the project which has made the most significant progress **improving their own project's stability, security, scalability and performance** deliverables, serving as a model for other ONAP projects to follow in this area.

| Nominated Candidate           | Reason for Nomination   |
|-------------------------------|---|
| <div>Usecase UI Project</div> | <p>In previous releases of UUI, in the docker image of the UUI server, there are also have Postgres database services. This a relally bad practice, a docker container have 2 components can lead to security issus.</p> <p>And in kohn release, we use common postgresql chart instead of embedding database server. We use a separate Postgres docker container, and moodify the existing code of UUI server to point to the new database.</p> <p>And also modify the deployment script of the UUI server to support the separate Postgres database.</p> <p><a href="https://jira.onap.org/browse/USECASEUI-405">https://jira.onap.org/browse/USECASEUI-405</a></p> |

### ONAP Demonstration Award(s)

**NOTE: Opt-in contest** open to any ONAP community members. [Entries Must Be Submitted Here](#). The TSC will then select up to 3 of their favorite demos from those submitted to receive an award

### Automation Testing & Test Coverage Award(s)

**NOTE: Hand chosen by TSC members-** Presented based on the TSC's evaluation and assessment of the impact an individual's contributions has had upon ONAP testing and test automation efforts.

|                |
|----------------|
| No submissions |
|                |
|                |
|                |

### Metrics Derived Awards

#### Code Development Award

**NOTE: Derived exclusively from LFX Insights Data** -Automatically awarded to the Top-3 contributors of *merged* code as measured between M1 and the Sign-off dates.

|                       |
|-----------------------|
| Liam Fallon           |
| Dan Timoney           |
| Vijay Venkatesh Kumar |
