Hi David,

Apologies for the late reply.

I have commented on <https://jira.onap.org/browse/DMAAP-1765> in relation to updating the test case to include the J versions. Michal had made the most recent change so may reach out to him again.

I'm not too sure about the health of the test case but will check asap.  
I am unable to attend the unmaintained repos meet lately due to a clash in meetings but will try to attend again soon.
