Objet : ONAP committer promotion

Hi Andy, Mark, Eric and Raluca,

As discussed in the previous EXTAPI meeting, considering the valuable contributions of [Adrian](#) O'Sullivan, his functional and technical expertise, his implication into ONAP usecases, I would really like to promote and approve Adrian as commiter for the External API NBI repository.

May I ask you a favor by replying to this email with your vote ?

Here is the updated template for commiter proposition
