ONAP Orchestrated SD-WAN and Edge

Service Design

- E2E service Design for SD-WAN & Edge deployment.
- Designing ONAP to facilitate the Service deployment & assurance.

Service Provisioning

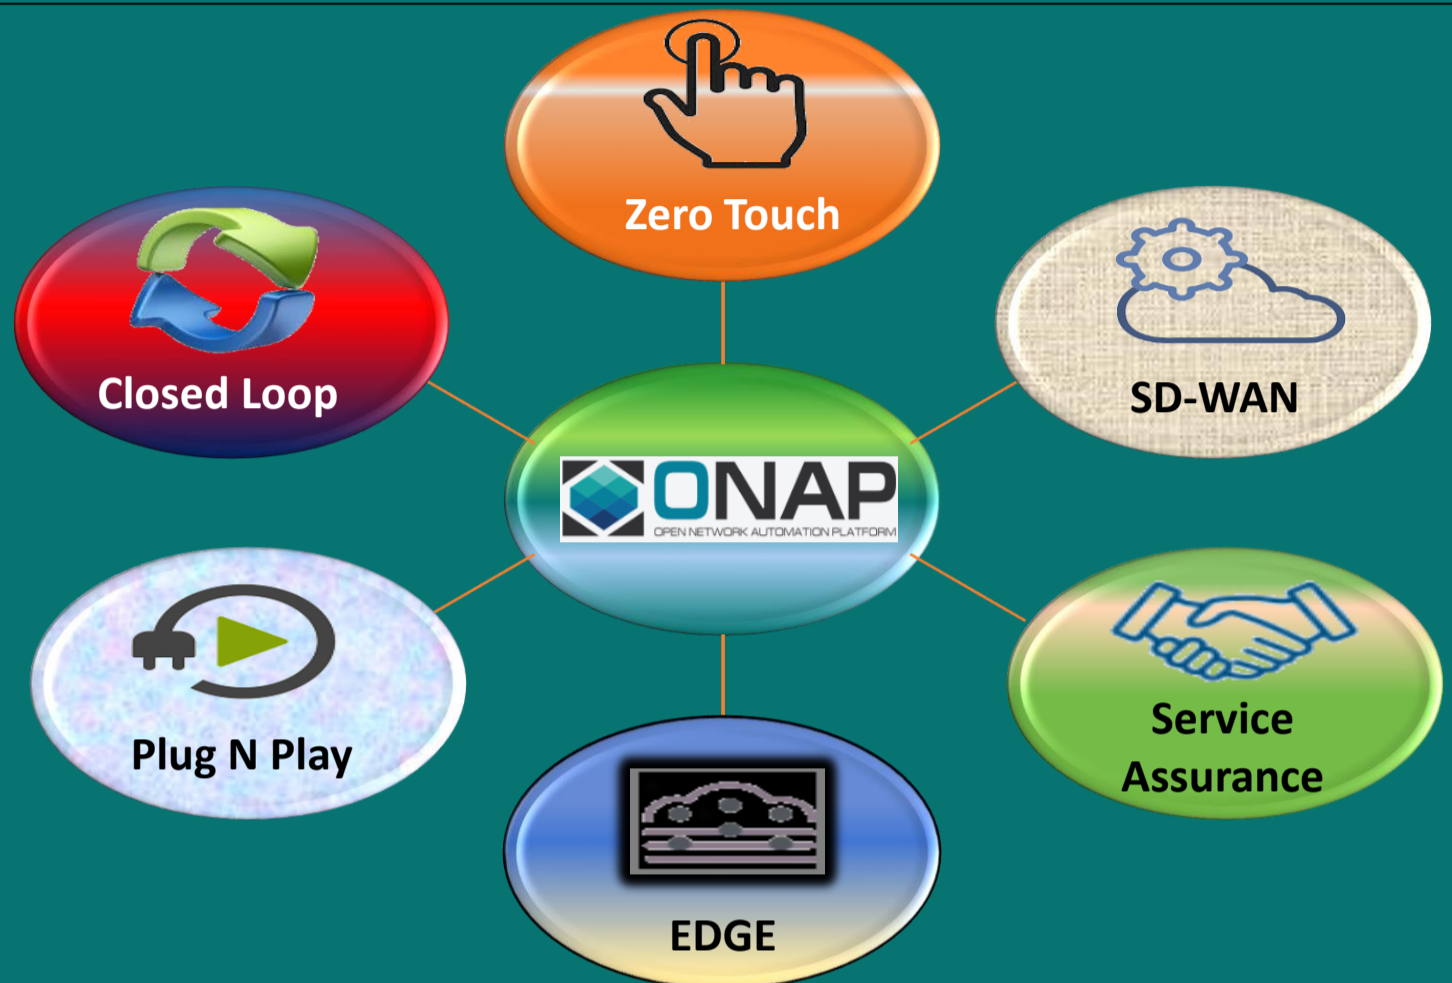

- E2E service provisioning by orchestrating the SDWAN and Edge resources.
- Zero touch provisioning of new Site to an existing service.

Plug and Play

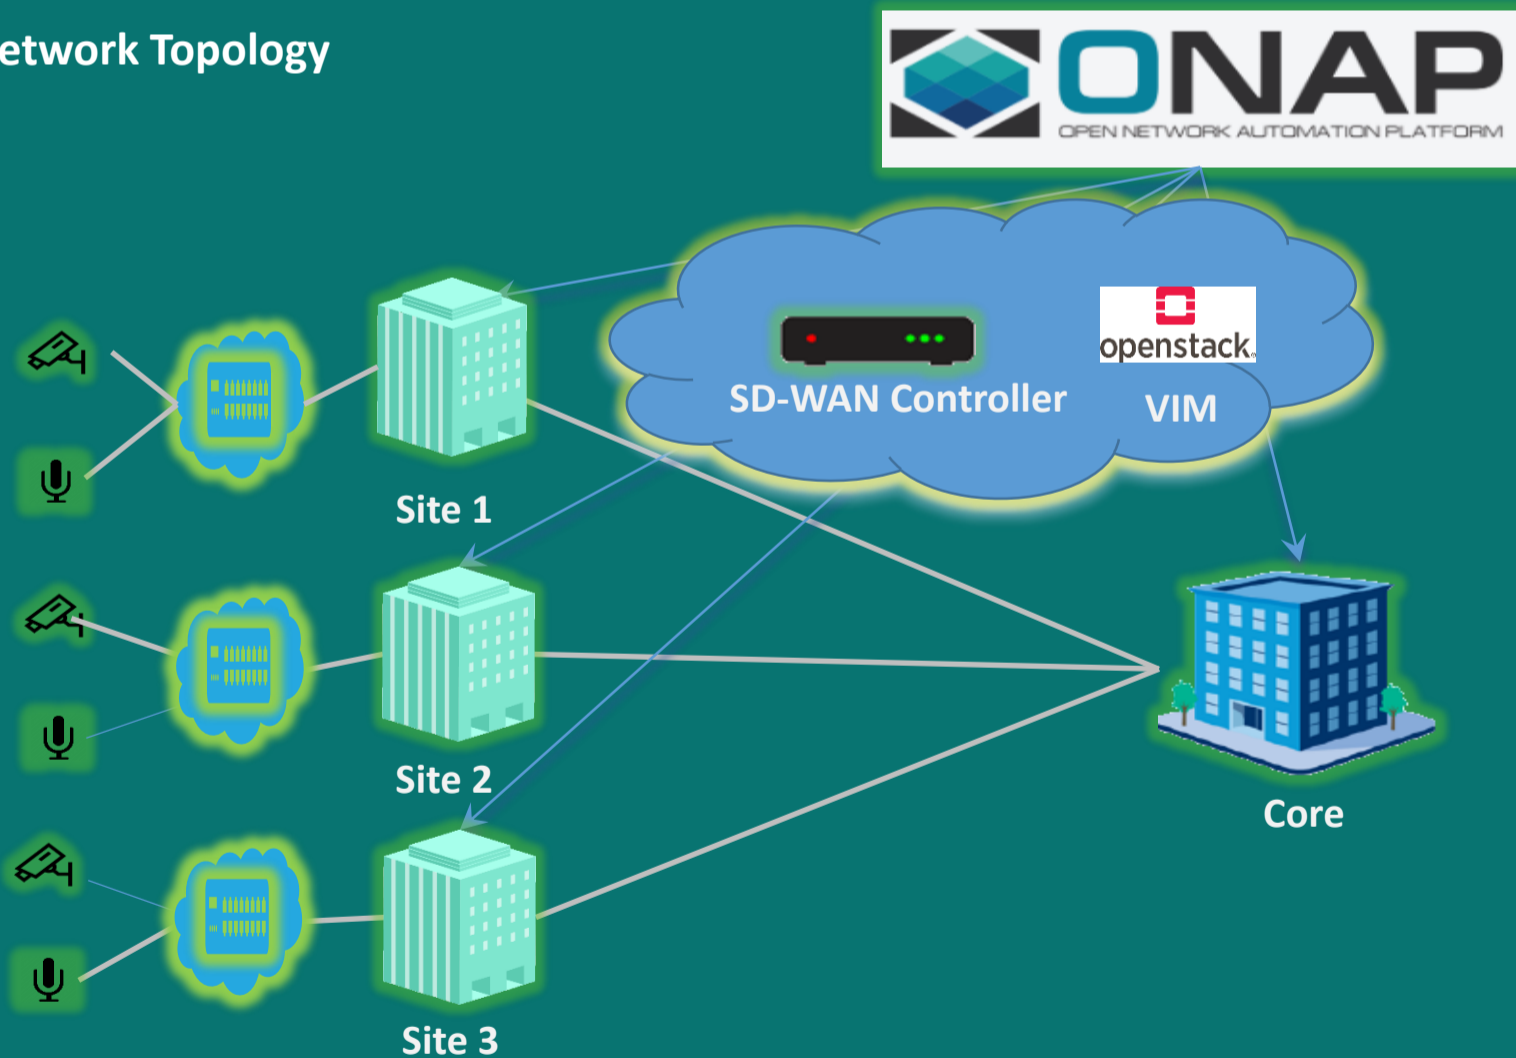

- Auto discovery of resources as and when they are available.
- Provisioning the discovered resources.

Service Assurance

- Anomaly detection & recovery.
- Service Quality assurance via bandwidth on demand (BoD).

Network Topology

Demo Scenario
