# Summary

- › Attended Portal SDK meeting Oct 22
- › Current version is 2.6
  - › Working on v3.0, which should be available for Guilin
- › Dependent projects using various versions back to v 2.3
- › Portal SDK team is tracking adoption status [here](#)
  - › Also includes link to release notes
- › AI for David to create JIRA tickets for each dependent project for M2/M3 for migration to v2.6 and add to table
- › Portal SDK conducting unit tests and development tests, but lacks the resources and expertise to conduct integration tests
  - › Lack of integration test resource is the biggest risk
