Subject: Vote for new committers in VF-C project

Dear VF-C committers,

Based on the contribution in VF-C project Dublin and EI Alto release, I would like to promote Hongyu Zhao and Yuanhong as VF-C committer.

Hongyu is the highest code contributor in VF-C Dublin and EI Alto release.

And Yuanhong contributed 1519 lines code for VF-C and made great help during vCPE and CCVPN use case integration testing, and she also actively participate in the discussion of the requirements of ETSI Catalog Manager.

So I suggest promote them as VF-C committers.

Please provide your voting +1/-1/0. Thank you.

Voting ends at 5:00 pm this Thursday (December 19)

BTW, I plan to clean the committer list based on your participation and contribution for VF-C and I will confirm with you everyone by mail, if you have any thoughts, please let me know. Thanks.
