

ONAP SDC&VFC Integration

Maopeng Zhang ZTE

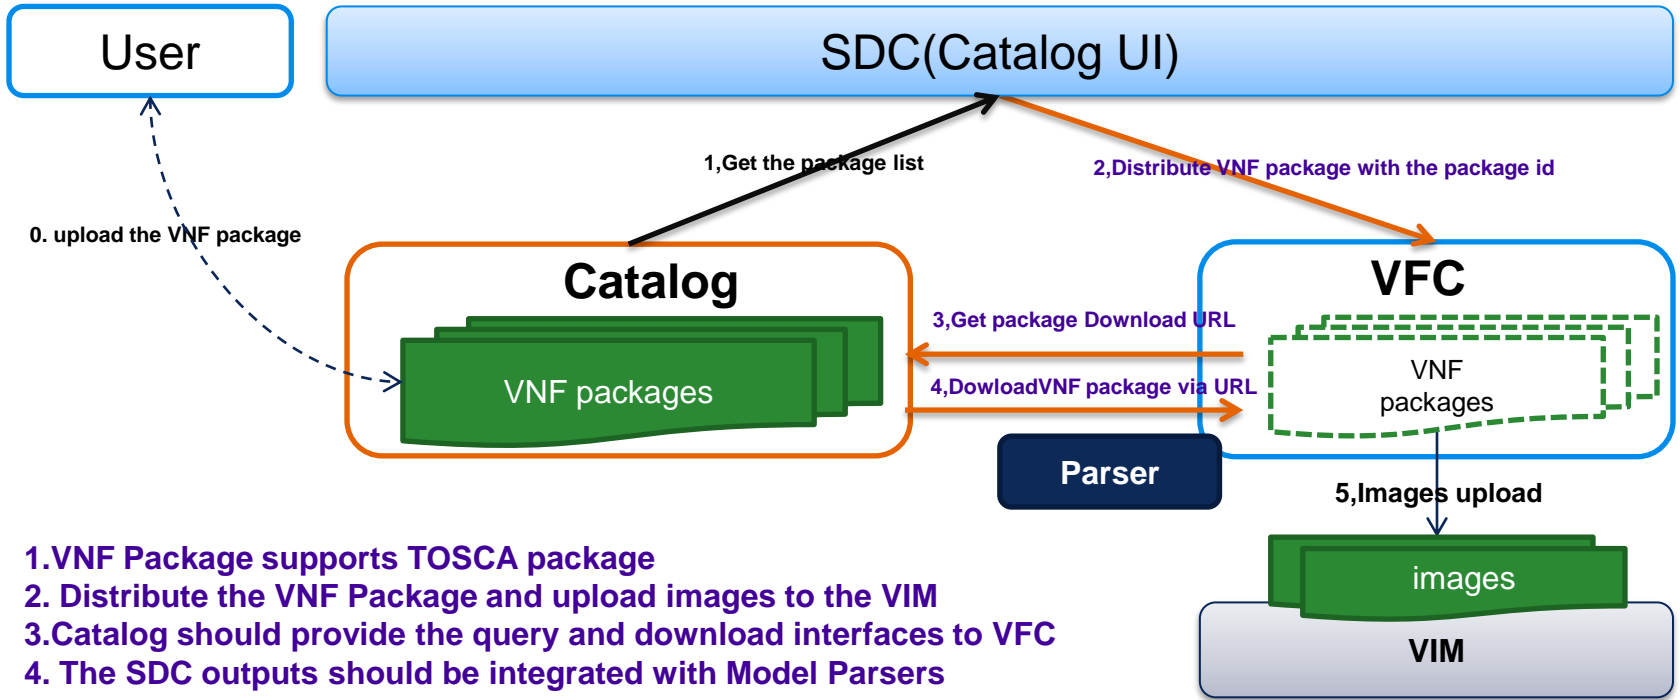

The VoLTE Usecase Workflow

ONAP SDC&VFC Integration R1 Requirements

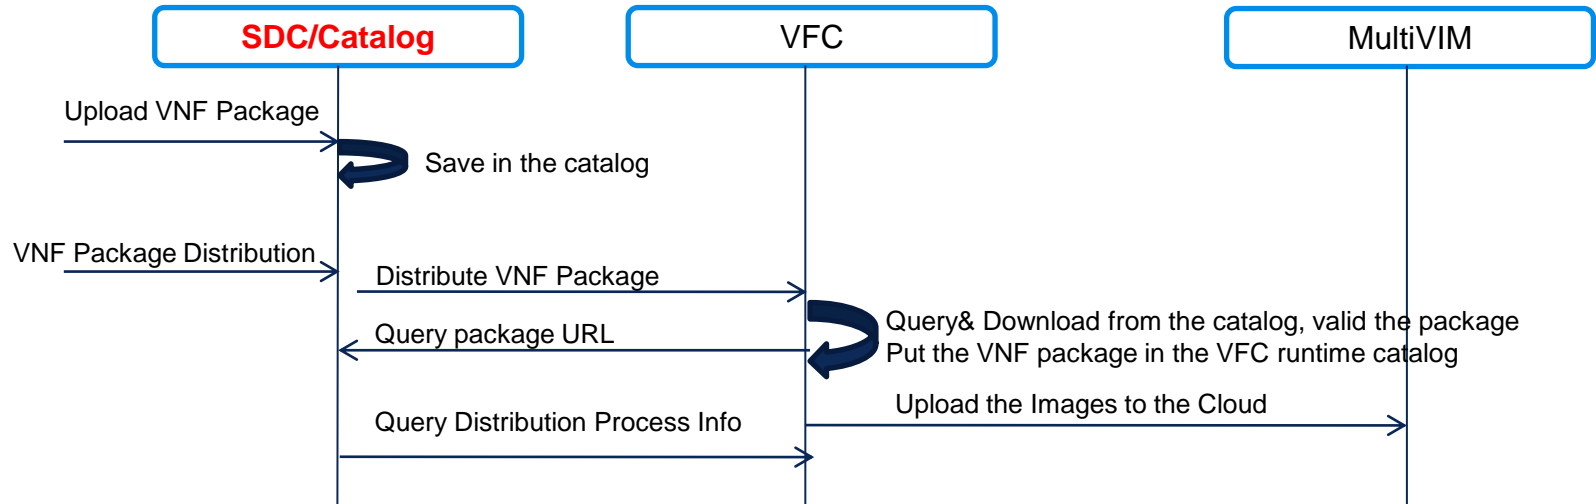

1. **Import VNF package in the Catalog**
2. **VNF Package Distribution**
3. **NS Package Design align with TOSCA NFV Profile**
4. **Instantiate NS using NS package**

VNF Package Distribution Requirements

- 1.VNF Package supports TOSCA package
2. Distribute the VNF Package and upload images to the VIM
- 3.Catalog should provide the query and download interfaces to VFC
4. The SDC outputs should be integrated with Model Parsers

R1 VNF Package Distribution Workflow

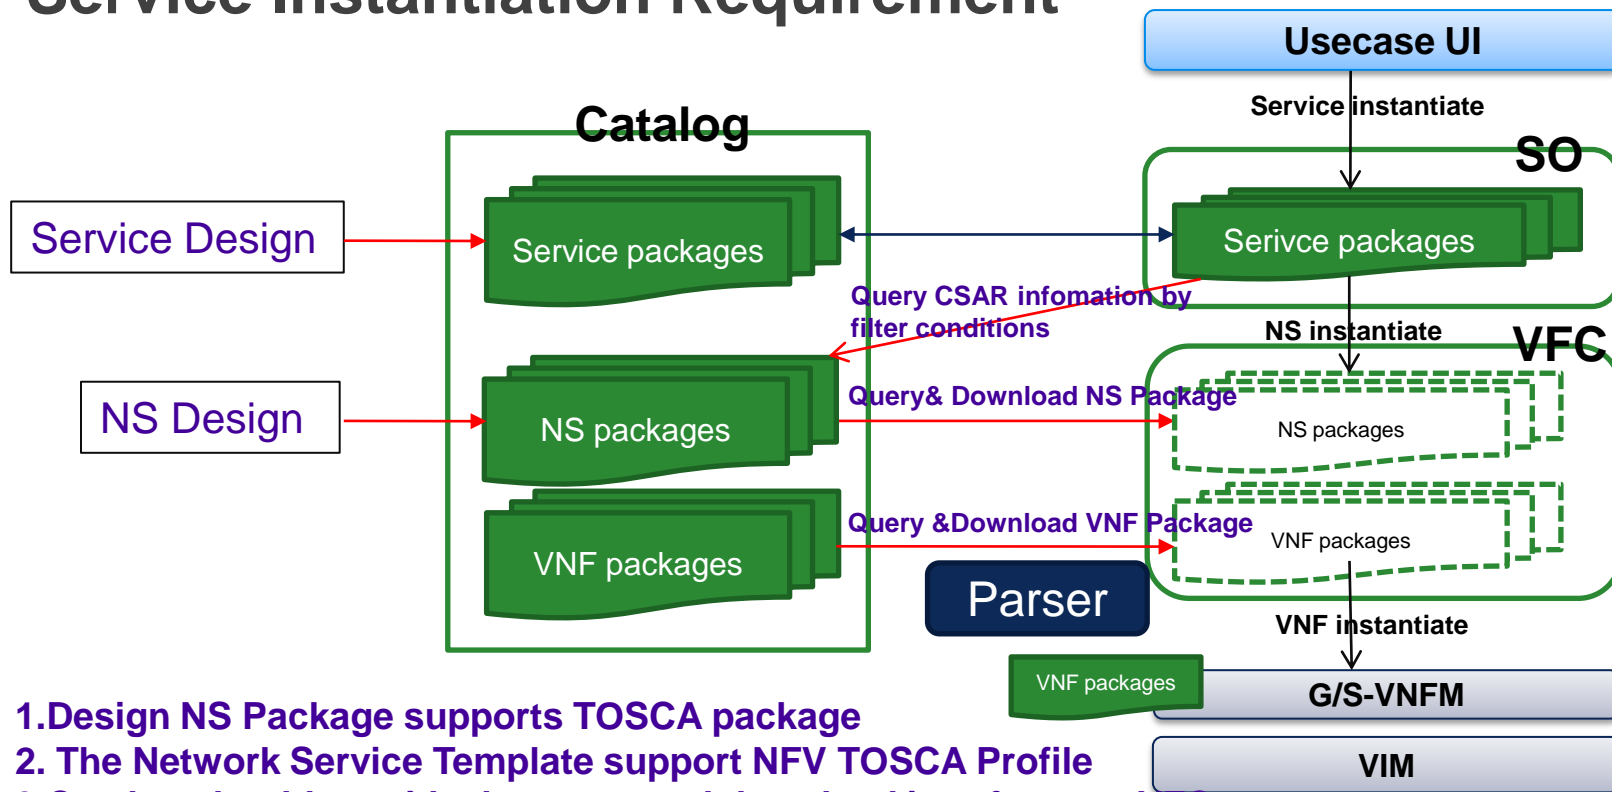

VFC :

1. Distribute **interfaces**
2. **Query** Distribute **process info**

SDC:

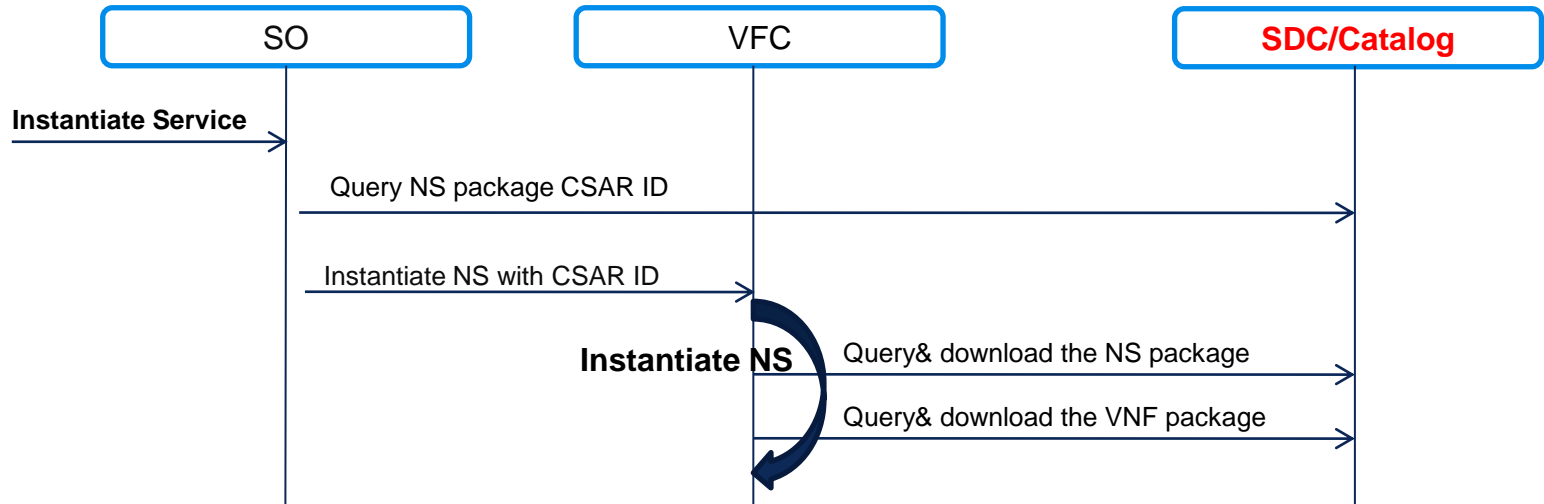

1. **Get package Download URL**
2. **Provide http URL to down load CSAR**

Service Instantiation Requirement

1. Design NS Package supports TOSCA package
2. The Network Service Template support NFV TOSCA Profile
3. Catalog should provide the query and download interfaces to VFC
4. The SDC outputs should be integrated with Model Parsers

Service Instantiation Workflow

SDC:

1. Query NS Package CSAR ID using NS information filter
2. Query package Download URL using CSAR ID
3. Provide http URL to download CSAR

VFC Catalog API Dependency Reference

| | |
|-------------------------------|---|
| query_csar_from_catalog | "/openoapi/catalog/v1/csars/%s" |
| query_rawdata_from_catalog | "/openoapi/catalog/v1/servicetemplates/queryingrawdata" |
| set_csar_state | "/openoapi/catalog/v1/csars/%s?%s=%s" |
| delete_csar_from_catalog | "/openoapi/catalog/v1/csars/%s" |
| get_download_url_from_catalog | "/openoapi/catalog/v1/csars/%s/files?relativePath=%s" |
| get_process_id | "/openoapi/catalog/v1/servicetemplates/%s/operations" |
| get_servicetemplate_id | "/openoapi/catalog/v1/servicetemplates" |
| get_servicetemplate | "/openoapi/catalog/v1/servicetemplates" |

Summary

| No | Gaps | Action Owner | When/Dead Line |
|----|---|---------------|----------------|
| 1 | Import VNF TOSCA Package into SDC Catalog, which supports TOSCA NFV Profile | SDC/Catalog | 2017.8.3 |
| 2 | NS package design supports CSAR and TOSCA NFV template | SDC/Catalog | 2017.8.3 |
| 3 | VNF Distribution | SDC/Catalog | 2017.8.3 |
| 4 | NS/VNF package info query with CSARID | SDC/Catalog | 2017.8.3 |
| 5 | NS/VNF package info query with filter conditions | SDC/Catalog | 2017.8.3 |
| 6 | Http server to download NS/VNF CSAR packages or templates | SDC/Catalog | 2017.8.3 |
| 7 | SDC Reg/Notify supports TOSCA CSAR packages and interfaces | SDC/Catalog | 2017.8.3 |
| 8 | VNF distribution function and interfaces | VFC | 2017.8.3 |
| 9 | Provide NS/VNF TOSCA NFV Profile | Model/VFC/SDC | 2017.8.3 |
| 10 | Model Parsers integrates with the SDC package output | Model/SDC | 2017.8.3 |

Need the SDC, VFC and Model parser to support TOSCA CSAR and satisfy the VoLTE Case Requirements

Q&A
