

Developer Wiki

This wiki is for developers and users of ONAP, an open source software platform that delivers robust capabilities for the design, creation, orchestration, monitoring, and life cycle management of Network Function Virtualization (NFV) environments, as well as Software-Defined Networks (SDNs).

 <p>ONAP OPEN NETWORK AUTOMATION PLATFORM</p>	<h2>What is ONAP?</h2>	  
--	------------------------	---

 <p>Casablanca Release ONAP OPEN NETWORK AUTOMATION PLATFORM November 30, 2018</p>
<h3>ONAP Architecture Overview</h3>

<p>ONAP DDF + OPNFV Plugfest FREE Training: Introduction To Report, January 2019 ONAP 5G Blueprint</p>

<h3>CCVPN Blueprint</h3>
<p>LAST EVENT:</p>
<p>ONAP BDP + OPNFV Plugfest, Jan 8-11, 2019, Nozay, France. Get the Report! VOLTE Use Case Blueprint</p>
<p>NEXT EVENT:</p>

ONAP Projects

- Approved Projects
- Deferred Projects
- Deprecated Projects
- Draft Projects
- Project Portals
- Rejected Projects
- Withdrawn Proposals
- Proposed Projects

Getting Involved in the ONAP Community

LFN Membership Guide

- Joining the ONAP Technical Community
- Mailing Lists
- Upcoming Events
- Presentations
- Technical Steering Committee (TSC)
- Community Meetings & Calendar
- Developer Best Practices
- Communications, Contacts & Email
- Intel/Windriver Openstack Lab Access
- Community Offices and Governance
- Security Space Wiki Access List
- Instant Messaging

Release Planning & Management

- Future of Releases in LF Releng
- INFO.yaml Guidelines
- Project Status in Amsterdam Release
- Project Status in Beijing Release
- Project Status in Casablanca Release
- Project Status in Dublin Release
- Release Calendar
- Release Planning
- Release Requests to LF
- Release Versioning Strategy
