- Documentation review https://gerrit.onap.org/r/#/c/47175/
- RC2
-

Discussion

- ONLU critical fixes as we reach RC2
- Integration daily meeting at 1100 EDT GMT-5 - address anything from the team (Brian Freeman)
- Michel Ptacek Q) on using latest docker images - see manifest and LF CI work - 🔖 ~~CIMAN-132~~ - Docker Standard Tag Format `DONE` -
  subtasks off
  - ⚡ ~~LOG-300~~ - CD: OOM framework for continuous E2E deploy validation of tagged commit/merge trigger docker snapshots `CLOSED` -
- Michel Ptacek Q) deployment on Redhat - can test using kubeadm instead of rancher (but rancher is the RI - hence Ubuntu 16 is the standard)
  - openshift on centos working except the expected failures being fixed
  - NFS question - required for now until the POC on PV work is in to swap out storage clusters
  - EFS/NFS for AWS supported outside the charts for now for example -
  - Q) NFS required only for pod relocations now - but need to verify - looks like it will be pod specific (ie: pod containers across multiple VMs)
- OOM heatbridge fix in - was last bug in the highest priority filter
- Mandeep Khinda q on helm 2.9 - to test https://git.onap.org/oom/tree/kubernetes/onap/Chart.yaml - but 2.8.2 is the official version matching k8s 1.8.10 right now. - oom-1075
- Mandeep Khinda cutting a branch?
- Mandeep Khinda patch for dynamic PV storage (swap out storage classes) - push to Casablanca? (touches every claim - too risky - push out) - OOM-787
- dcae - Michal Ptacek - issues purging DCAE - as this is secondary orchestration - makes sense a cleanup only works manually - bug/feature for cloudify work here
  - TODO: Michael O'Brien (Amdocs 1705-1905) Reach out to Lusheng if they are addressing the clean up themselves - if not we will raise a defect
- bug review
  - 1086 - in review
  - 1085 - in draft review (appc changes)
  - 1070 - mike o to take 1070
  - 1044 - mike o to look at warning - move to casablanca
  - 1019 - working doc change
  - 1015 - champ move to aai board (reopened yesterday) - Mike E to move
  - 970 - mysql password for sdnc - - TODO: check with James MacNider
  - 968 - dup to 1044
  - 925 - close cassandra bug
  - 926 - mandeep to look into /dockerdata-nfs default
  - 927 - mike E next week on production deployment
  - 905 - nsPrefix - Priyanka has it - should be done (3 components of 6)
  - 887 - sdnc schema - mandeep has patch
  - 876 - containers ignore repo setting - sync with Shane -TODO: Mike Elliott to take on
  - 875 - robot logs - mandeep looking at
  - 794 - close
  - 1031 - config changes consul - merged
  - 833 - licensing - finishing for next week
  - 793 - to roger for doc - could move out if not part of 822 docs
  - 763 - optimize config - move out
  - 677 - source license headers - assigned
