

ONAP Developer Wiki

This wiki is for **developers** of ONAP, an open source software platform for the orchestration, management, and automation of network and edge computing services for network operators, cloud providers, and enterprises. Its real-time, policy-driven orchestration and automation of physical and virtual network functions enables rapid automation of new services and complete lifecycle management critical for 5G and next-generation networks.

If you are looking for documentation on administering or deploying ONAP, please head to our official Project documentation site: <https://docs.onap.org/en/honolulu/guides/onap-operator/index.html>

[Latest Release: Honolulu](#)

[Use Cases & Blueprints](#)

[ONAP Training & Exam](#)

ONAP Projects List

Getting Involved in the ONAP Community

- [Code of Conduct](#)
- [Slack channel](#) (most contributing company domains should already work)
- [LFN Membership Guide](#)

Technical Steering Committee (TSC)

- [Joining the ONAP Technical Community](#)
- [Mailing Lists](#)
- [Upcoming Events](#)
- [2017 Launch Presentations](#)
- [Community Meetings & Calendar](#)
- [Developer Best Practices](#)
- [Communications, Contacts & Email](#)
- [Intel/Windriver Openstack Lab Access](#)
- [Community Offices and Governance](#)
- [Security Space Wiki Access List](#)
- [Instant Messaging](#)
- [How-to articles](#)
- [Copy of Community Meetings & Calendar TESTING](#)

Upcoming Events

Recent Events

- [ONESummit - October 11-12](#)
- [LFN Developer & Testing Forum, Week of June 7th, 2021 \(Virtual\)](#)
- [LFN Developer & Testing Forum, Feb 1-4, 2021 \(Virtual\)](#)
- [2020 October Virtual Technical Event](#)
- [2020 June Virtual LFN Developer & Testing Forum](#)

Release Planning & Management

- [Release Planning](#)
- [Project Status](#)
- [Release Process](#)
- [Milestone and Requirements Exception Request Process](#)
- [Self Release Workflow](#)
- [Long Term Roadmap](#)
- [Requirement Types](#)
- [Other Info](#)
