ONAP Developer Wiki

This wiki is for developers of ONAP, an open source software platform for the orchestration, management, and automation of network and edge computing services for network operators, cloud providers, and enterprises. Its real-time, policy-driven orchestration and automation of physical and virtual network functions enables rapid automation of new services and complete lifecycle management critical for 5G and next-generation networks.

If you are looking for documentation on administering or deploying ONAP, please head to our official Project documentation site: https://docs.onap.org/en/istanbul/guides/onap-operator/index.html

ONAP Projects List

Getting Involved in the ONAP Community

- Code of Conduct
- Slack channel (most contributing company domains should already work)

Technical Steering Committee (TSC)

- Joining the ONAP Technical Community
- Mailing Lists
- Upcoming Events
- 2017 Launch Presentations
- Community Meetings & Calendar
- Developer Best Practices
- Communications, Contacts & Email
- Intel/Windriver Openstack Lab Access
- Community Offices and Governance
- Security Space Wiki Access List
- Instant Messaging
- How-to articles
- Copy of Community Meetings & Calendar TESTING

Release Planning & Management

- Release Planning
- Project Status
- Release Process
- Milestone and Requirements Exception Request Process
- Self Release Workflow
- Long Term Roadmap
- Requirement Types
- Other Info

ONAP Community Awards

Most Recent Event

- LFN Developer & Testing Forum EU - June 13-16, 2022, Porto, Portugal

Reporting Vulnerabilities

Project Technical Leader (PTL)
Issue Management

- Tracking Issues with JIRA
- Issue Reports
- JIRA Design Pages

LF RelEng Support

- Getting LF IT Help Document

The LFN Online Store

- Name of the PTLs and approved Projects
- Weekly PTL Meetings
- Communications, Contacts & Email Table
- Voting Results History
- Read about PTL in the “Community Offices and Governance” Document
- Read about PTL in the “ONAP Technical Community” Document

Resources For Developers

- Required Tools
- Setting Up Your Development Environment
- Development Procedures and Policies
- APIs
- Development Guides
- Tutorials
- Developer Meetings
- Proposal to Move to SCM/CI As A Service
- Code Scanning Tools and CI
- Repository Management
- Changing your email address

Contributing to the Wiki

- How to create content in the Developer Wiki
- Style Guide
- Templates
- Confluence Help

Open Source

- Contribution Agreements
- Copyrights and License Declarations
- Related Open Source Projects and Components
