Integration Project

Scope

The integration project has been approved on the 5th of November 2017, see initial description.

Most of the initial scope is still valid. The main missions consist in:

- Providing testing environment and support for the release use cases
- Executing Cross-project Continuous System Integration Testing (CSIT)
- Managing full ONAP CI chains (daily master, staging, stable) to ensure the stability of the integration
- Developing and perform tests within full ONAP context (healthcheck, End to End, performance, robustness...)  
- Validating the ONAP release

Due to the diversity of the project, the integration team manages several official ONAP repositories: integration/*, testsuite/*, demo/*, oparent/*.

Q&A

Organization

- How can I get started with ONAP?
- How can I get access to one of the ONAP integration labs?
- How to add keys to access integration labs?

CI/CD

- How can I include my test(s) in CI chains?

Useful links

Test

- Robotframework
- Python-onapsdk

Languages

- Python
- GO
- Bash

CI/CD
**User Guide**

**Use Cases**

**Integration Page**

- How does OOM gating work?
- How can I build a jenkins job (JJB)?
- Where can I see CI/CD ONAP status?
- Where can I find the list of tests included in the CI/CD?
- How to run a weekly tests?
- How to create a new pipeline (with new ONAP version)?

**Tests**

- Where can I find the list of supported use cases?
- Is there any available simulators/emulators I could reuse for my own use case?
- How to start with xtesting?
- How to start with Python-onapsdk?
- How do I run xtesting tests on my ONAP lab?
- How can I create an installation cross component health test?
- How Can I move my tests from CSIT to my repo?
- How to run stability tests?
- How to re-run a test on a daily platform?

**Misc**

- How can I build a docker image?
- Where can I find a java 11 baseline image for my component?
- How can I use Python baseline image?
- How can I manage container tags?
- and many more

**Use Cases**

- vCPE
- vFW
- vFWCL
- vFW CDS
- Scale-out/vLB

**Infrastructure**

- Kubernetes
- Openstack
- Docker

**Training**

- katacoda
