| **ArchNav Internship** | • Introduction of Nicholas Karimi  
• ONAP Web Based Architecture Navigation Solution  
• Architecture Navigator page [doc project: Architecture Navigator (ArchNav)]  
• contribution currently scheduled until end of Jul 2021  
• Ultimate goal is to have a good structure to get information easily findable.  
  - First: Identify Maintenance Model (who is able to maintain it in production / for all the upcoming releases of ONAP)  
  - Identify the use cases currently applied to ArchNav and use cases for the Doc team's needs  
  - Look at the potential use of LF Landscape  
  - Look at the potential use of inkscape for a clickable graphic (Eric Debeau has done a PoC of the functionality) |
| **NOT DONE DUE TO TIME CONSTRAINTS** | |
| **Open gerrit issues** | • We went through the open gerrit issues for Honolulu (Maintenance) / Istanbul release |
| **Open jira tickets** | • We went through the open Jira issues for Honolulu (Maintenance) / Istanbul release  
  - Thomas Kulik: Propose that every project should use tox.ini (incl. link check)? Create a new Epic for this? conf.py must be updated as well!  
| **Sprints** | • Should we structure our (doc) work in sprints?  
  - Thomas Kulik: Ask for DT-internal help to set up this structure. Eric Debeau and Andreas Geissler will help as well. |
| **Doc Tracking Page** | • Updates |
| **Guide Doc Dev System** | • Released and updated; Timo Perala volunteers for review. |
| **Upcoming Meetings / Vacations** | • A few previous meetings have been canceled due to vacation, public holidays in Germany and the LFN DTF.  
  • 17.06.2021 until 25.06.2021: Vacation Eric Debeau  
  • 24.06.2021 until 01.07.2021: Vacation Thomas Kulik |
| **OPTIONAL (IF TIME ALLOWS)** | |
| **All** | • Collection of topics not started  
  - Dedicated repo for every subcommittee (that creates and maintains formal ONAP documentation)? To be discussed.  
  - Fix ReadTheDocs starting page to the last official release (and not 'latest').  
  - add tracking information to the new docs tracking page (currently WIP!) To be discussed.  
  - Copyright notice an RTD still shows the wrong year. |
Objectives for Honolulu (and onward)

- Jira ticket walkthrough,
  - The team will investigate further with the OOM team on how to enable a non-voting job for warnings.
  - Check why closes ticket show up even when the filter is set to "Open" or "In progress"

Honolulu Maintenance Release

- For future collaboration and facilitation we will ask for a time slot in the arch subcommittee meeting to inform and educate how to work with docs.
- Discuss with architecture team, how the following docs can be transferred to RTD:
  - Documenting ONAP Architecture (New)
  - Istanbul R9 Architecture General Description
  - Istanbul R9 ONAP Architecture Component Description

Architecture documentation

- Many links are managed in RTD
  - local links within a repo
  - inter-project links using inter-links from sphinx
  - links to code repo
  - external links to web sites
- There is a problem when a documentation links to a repo => the branch is not indicated. As result, the link points to the latest release
- Proposition to provide guidelines to be then presented for PTL

- Many links are broken => need to include a test in JJB and provide information about broken links
- Feedback has been given, positive output. Next step, bring to PTL
- Still required from the project to test
Andreas Geissler showed a solution to create project docs manually within gerrit in case a project has branched but not changed any doc file in the new branch afterwards. There are extended right in gerrit needed.
