VNF Validation Program Proposals

When introducing significant changes to the VNF Validation Program (VVP) project or changes that may require discussion. It recommended that a Proposal be created. The wiki page will be the place to collaborate and track changes as the proposal is reviewed, revised, and ultimately accepted or rejected.

Please follow these steps when creating a proposal.

1. Copy the Proposal Template and create a page under the Proposals section of the VNF Requirements Wiki.
2. Update the content of your proposal and set the status to Draft
3. Create a JIRA ticket in the VNF Validation Program (VVP) project announcing the proposal, and also put a reference to the ticket on the Proposals page
   a. Project: VNF Validation Program
   b. Issue Type: Epic
   c. Summary: Proposal Review: Title of Proposal
   d. Description: Link to proposal
