The Portal project was moved to "unmaintained" status by the TSC on 08 Apr 2021.

Welcome to the Portal Project space.

The ONAP Portal is a platform that provides the ability to integrate different ONAP applications into a centralized Portal Core. It allows decentralized applications to run within their own infrastructure while providing common management services and connectivity. The Portal core provides capabilities including application onboarding & management, centralized access management, and hosted application widgets. Using the provided SDK, application developers can leverage the built-in capabilities (Services / API / UI controls) along with bundled tools and technologies.

### Resources
- Code of Conduct
- JIRA Agile Board
- Repos (portal; portal/sdk)
- Releases
  - Sonar Code Portal
  - Sonar Cloud SDK
  - Coverity Report
- Test Specifications
  - Requirements & API Specifications
- Integration Tests
  - Portal SDK usage (Policy, SDC, VID, AAI, U-UI, CLI, OOM, MSB)
- Useful Links:
  - Metrics - Bitbucket
  - Metrics - LF
