</table>

3 issues

- The team will investigate further with the OOM team on how to enable a non-voting job for warnings.
- All done for the doc project (date in the release note might need to be updated). Still lacking some project updates
- For future collaboration and facilitation we will ask for a time slot in the arch subcommittee meeting to inform and educate how to work with docs.
- David McBride will join to discuss this further.
- Active projects vs maintenance projects.
- Call scheduled for Tuesday WW13
Many links are managed in RTD

- local links within a repo
- inter-project links using inter-links from sphinx
- links to code repo
- external links to web sites

There is a problem when a documentation links to a repo => the branch is not indicated. As result, the link points to the latest release.

Proposition to provide guidelines to be then presented for PTL.

Many links are broken => need to include a test in JJB and provide information about broken links.

Feedback has been given, positive output. Next step, bring to PTL.

Still required from the project to test.
