# 2021-07-22 Doc project meeting

## Attending

Nicholas Karimi  
Andreas Geissler  
Eric Debeau  
Thomas Kulik

| **ArchNav Internship / SVG ArchMap** | - ONAP Web Based Architecture Navigation Solution  
- Architecture Navigator page @doc project: Architecture Navigator (ArchNav)  
- contribution of Nicholas Karimi currently scheduled until the end of July 2021  
- Ultimate goal is to have a good structure to get information easily findable.  
- ArchNav is used also in the process of architecture reviews and holds additional information about ONAP uses cases  
- POC/Proposal for an architecture map natively designed in Inkscape has started. The SVG format has capabilities to add links, additional text and mouse-over effects to elements. Presentation in the ARC subcommittee meeting as well in the TSC are planned.  
- The idea is that this SVG-map is handed over to architecture team to be maintained in the future. Also it is planned to use it in RTD for a user-friendly entry-point for navigation.  |
| **TASKS:** | - First: Identify Maintenance Model (who is able to maintain it in production / for all the upcoming releases of ONAP)  
- Identify the use cases currently applied to ArchNav and use cases for the Doc team's needs  
- Look at the potential use of LF Landscape  
- Look at the potential use of Inkscape for a clickable graphic (Eric Debeau has done a PoC of the functionality)  |
| **Architecture Documentation in RTD** | There is the need to move finalized ONAP architecture documentation from DevWiki to RTD. Especially the following section are from interest (examples from the Istanbul release):  
- Architecture Map  
- Component Descriptions (incl. sub-pages)  |
| **TASKS:** | - Andrea Visnyei to support the process of transferring the information from DevWiki to RTD  
- Thomas Kulik to support here and check how this process can be automated. Especially the embedded draw.io diagrams (special confluence macro) may cause problems if we use confluence2md to export pages). Schedule a meeting with Chaker Al-Hakim team.  
- Chaker Al Hakim and team to support the transfer.  
- Chaker Al Hakim, Thomas Kulik and teams to create a process to transfer information to RTD also for upcoming releases.  |
| **Issue with RTD TOC** | We will do it in jira!  |
| **TASKS:** | Andrea Visnyei / Thomas Kulik check RTD TOC for https://docs.onap.org/en/latest/guides/onap-developer/how-to-use-docs/templates.html  |
| **Doc Templates** | Andrea Visnyei and Andreas Geissler to check current component template and improve if needed  |
| **API Documentation** | Kenny Paul, Eric Debeau Session with Andy Mayer needed to clarify how we continue on the API documentation (swagger). The API docs are part of the ARC docs. See also in DevWiki.  
Nicholas Karimi join Kenny in the discussion with Andy Mayer.  
See also in Swagger in RTD  |
| **Doc Guideline** | Ask users to add always the original file of graphics to the repo (plus the bitmap version of course which is used in wiki/RTD)  |
| **Istanbul Release** | #doc team: Review Istanbul release notes and project content; extra session required; to be planned.  |
| **Usages of Confluence "Tasks" in Meeting Notes** | Please do not use "Tasks" in this meeting note. The meeting note is planned to be copied for the next meeting. Unfortunately all "Tasks" are also copied and a NEW INSTANCE of this tasks is created. This leads to multiple duplicated of a single task.  
Suggestion: Create a single "Task Page" and embed only a reference in this meeting note. Please always check upfront if this task can/must be added to the DOC JIRA issues instead.  |
- next #doc meeting scheduled for 29.07.2021  |
| **NOT DONE DUE TO TIME CONSTRAINTS:** | Open Gerrit issues  
- We went through the open gerrit issues for Honolulu (Maintenance) / Istanbul release  |
<p>| <strong>Open Jira tickets</strong> | - We went through the open Jira issues for Honolulu (Maintenance) / Istanbul release  |
| <strong>TASKS:</strong> | Thomas Kulik: Propose that every project should use tox.ini (incl. link check)? Create a new Epic for this? conf.py must be updated as well  |
| <strong>Sprints</strong> | - Should we structure our [doc] work in sprints?  |
| <strong>TASKS:</strong> | Thomas Kulik: Ask for DT-internal help to set up this structure. Eric Debeau and Andreas Geissler will help as well.  |</p>

The team will investigate further with the OOM team on how to enable a non-voting job for warnings.

**TASKS:**
Check why closes ticket show up even when the filter is set to “Open” or “In progress”

**5 issues**

---

## Honolulu Maintenance Release

- Open

**Tasks:**
- For future collaboration and facilitation we will ask for a time slot in the arch subcommittee meeting to inform and educate how to work with docs.
- Discuss with architecture team, how the following docs can be transferred to RTD: see:
  - Documenting ONAP Architecture (New)
  - Istanbul R9 Architecture General Description
  - Istanbul R9 ONAP Architecture Component Description

---

## Link management in RTD Eric Debeau

Many links are managed in RTD
- local links within a repo
- inter-project links using inter-links from sphinx
- links to code repo
- external links to web sites

There is a problem when a documentation link to a repo => the branch is not indicated. As result, the link points to the latest release

Proposal to provide guidelines to be then presented for PTL

Many links are broken => need to include a test in JJB and provide information about broken links

Feedback has been given, positive output. Next step, bring to PTL

Still required from the project to test

---

**Guide Doc Dev System**

- Released and updated; Timo Perala volunteers for review.
Andreas Geissler showed a solution to create project docs manually within gerrit in case a project has branched but not changed any doc file in the new branch afterwards. There are extended right in gerrit needed [1].
