

# 2017-08-10 A&AI Weekly Meeting notes

## Date

03 Aug 2017

## Attendees

- [James Forsyth](#)
- [Rich Tabedzki](#)
- [Steven Blimkie](#)
- [Tian Lee](#)
- [Abinash Vishwakarma](#)
- [Adrian Slavkovsky](#)
- [Dileep Ranganathan](#)
- [Zi Li](#)
- [Sreenivasa Reddy](#)
- [Wang Rui](#)

## Goals

- Status of JIRA issues
- Review M2 milestones

## Discussion items

Time	Item	Who	Notes
	CSIT Functional Testing	<a href="#">James Forsyth</a>	Need a plan for developing a CSIT test case
	Sonar coverage		Need to increase our Sonar code coverage
	Licensing		Level set on license policy for ONAP A&AI
	Dev best practices		Don't break the build, if you do, fix it. The single "master" branch is making it difficult to develop directly on the branch. Features with multiple people doing develop, it is difficult to work off a single branch. Consider using gerrit drafts, #1 priority is to make the verify job good enough to give the developer confidence that the build is not, in fact, broken.  Until the release branch is cut for Amsterdam, how does Beijing work proceed - raise Q with onap-discuss list for community feedback.
	ESR		New repos are in place, <a href="#">Zi Li</a> has what she needs to proceed with import of ESR
	September ONAP Dev F2F		Not sure who will represent A&AI in person, no one from the call is planning to attend. If any team members have issues to discuss, please post to this page: <a href="#">September 26-28 Topics</a>

## Action items

From last week:

- ☐ Steve Blimkie to engage Manisha/Harish with respect to the status of the proposed schema changes which are currently under review for MultiCloud
- ☐ Steve Blimkie to raise issue of documenting V1.0=>v1.1 API changes with Manisha/Harish
- ☒

This week:

- ☐ Functional test in verify job: [Michael O'Brien - \(deprecated as of 20170508\) - use obrienlabs](#) will look into it(20170818: update:  **AAI-189** - AAI Deployment Integration Jenkins job using OOM-K8S - to validate branch CLOSED), [James Forsyth](#) will consult AT&T resources for suggestions
- ☒ AAI-58 CSIT Test case. Coverage: 1) aai/resources 2) aai/traversal 3) aai/data-router 4) aai/search-service. James Forsyth will write 4 stories under epic AAI-58, and look for team members to pick them up. Look to re-use the vFw robot framework test case as A&AI first test case
- ☒ Sonar coverage: James Forsyth will write a new epic and add stories specific to the various microservices
- ☒ James Forsyth look at the license story for deprecated aai-service
