

# Policy Sprint #3 Scrum 2017-08-10 Meeting notes

## Date

10 Aug 2017

## Minutes

- We reviewed open JIRAs for this sprint: <https://jira.onap.org/issues/?filter=10560>
- Need updates from missing attendees:
  - Ralph, Ali, non-ATT folks
- Ali Scrum Report: Yesterday I reviewed several critical SONAR issues and added comments on a few for Jorge to review. I also attended a meeting with Chenfei and others to go over requirements for my user story. I have a better understanding of my user story Policy-102 and am able to get started on that today. I found the MSO AID on the onap wiki but I am looking for a contact on the MSO team to find out if there's an updated AID.
- Update from Kevin - Detailed review of Drew's IntegrityAudit sonar changes. Added sql scripts to the feature/db/session/sql directory for DB table creation. Today: Need to test sql scripts and work on logging refactor.
