

Integration Meeting Minutes

04 Oct 2023

Agenda:

- Staging pipeline migration details in progress:
 - We have confirmation that VEXXHOST will be our build target
 - We will be using k8s as a service offered by VEXXHOST
 - Ideally we won't be responsible for any infra operations/issues - if we use k8s as a service LFIT will handle support
 - Pipeline triggers will be done in Github Actions
 - We will send a self-contained payload (zipped charts and a test execution command?) as the k8s can't be accessed externally
 - Results will be published when the run ends

- [Integration weekly meeting 2017 archives](#)

02 Aug 2023

Agenda:

- SDC tests fail in different ways between 1st and 2nd runs. Right now only logs from 2nd run are saved which makes debugging difficult. Lets try to:
 - remove retries in python sdk tests (maybe tests are not 100% reproducible?)
 - if the above does not work - try to hack some workaround
- CR with testkube chart is waiting for review <https://gerrit.onap.org/r/c/testsuite/+135640>
 - tox yaml linting was changed to ignore helm directory files as helm is not a valid yaml

26 Jul 2023

Agenda:

- Message router errors are seen in Kiali
- Introduction of testkube as an optional test component
 - We will use upstream - original testkube operator umbrella chart
 - Tests will be provided in one of the integration repos
 - Later we can include it in chained-ci process

05 Jul 2023

Agenda:

- Azure migration halted
- Daily post-configure pipeline fails on Prometheus installation - [Marek Szwakiewicz](#) take a look at version pinning
- All daily tests green
- What is up with weekly?

17 May 2023

Agenda:

- Status of Azure migration [Marek Szwakiewicz](#)
- State of release preparations
- UNH lab for gating status
- Gating unblocked

10 May 2023

Agenda:

- Status of Azure migration [Marek Szwakiewicz](#)
- State of release preparations
- UNH lab for gating
- Gating failures due to libssl version change?

19 Apr 2023

Agenda:

- Decide should we start migration **out** of Azure
 - Andreas and Marek vote YES we should invest time into migration to UNH
- Errors we see in SDC-be logs regarding decryption of auth header.
 - SDC meeting was cancelled this week, maybe we can try to chat about it next week.
- Daily network issues in DT lab, do we have Dailies elsewhere?
 - Issues are caused by DNS problems in DT lab
 - Dailies are run only on DT lab - that is an issue
- List of stale repositories <https://jira.onap.org/projects/INT/issues/INT-2195>
- Figure out the availability and parameters of LFN openstack [Marek Szwakiewicz](#)

12 Apr 2023

Agenda:

- Gating and dailies are down due to Nexus on azure being dead. Lets talk about this.
 - Switch to main nexus and get docker credentials
 - docker account credentials are not available outside jenkins
 - Next steps:
 - Escalate Azure ownership to LFN
 - Notify Cedric/raise issue for him about this
 - [Micha Jagieo](#) will chat with Pawe about maybe calling Eric?
 - UNH option
 - create k8s env manually
 - switch gating jobs
 - create nexus proxy
- Errors we see in SDC-be logs regarding decryption of auth header.
 - Maybe its SDC-fe adding second header with the same name? If yes we need to fix it.
 - Add ticket about it to SDC project
- PNF registration failure (probably) caused by database access during stability tests being very slow, its worth to test it with sidecar disabled on mariadb?
 - Ticket? [Marek Szwakiewicz](#) will find/create ticket
 - [Marek Szwakiewicz](#) will try to disable sidecar and run tests as soon as gating is working again
 - Marek did NOTHING in this topic

Changes:

- [Addition-Deletion PNF Support in Automation](#)
- [Add sample-app as a test module with function of converting actn-model to customer OSS model](#)

05 Apr 2023

Agenda:

- Gating and dailies are down due to Nexus on azure being dead. Lets talk about this.
 - Option 1: Ask [Micha Jagieo](#) for VM node access? (assuming he has one) (verified that [Micha](#) does not have the credentials)
 - Option 2: Ask LFN (who?) for access to azure panel so we could restore vm credentials (asked here <https://jira.linuxfoundation.org/plugins/servlet/desk/portal/2/IT-25384> but LFN doesn't have access to Azure or VMs)
 - Option 3: Switch to main nexus and get docker credentials
- Errors we see in SDC-be logs regarding decryption of auth header.
 - ?
- Database access during stability tests is very slow, its worth to test it with sidecar disabled on mariadb

- [Marek Szwakiewicz](#) will try to disable sidecar and run tests as soon as gating is working again

Changes:

- [Add sample-app as a test module with function of converting actn-model to customer OSS model](#)
- [Addition-Deletion PNF Support in Automation](#)
- [API support for Upgrade Scenarios](#)
- [Add interfaces in actn-client and modified pom files](#)

29 Mar 2023

Agenda:

- Migration of chained-ci to LFN repository - problem with artifacts fetching blocks the transition
 - Implement solution #1,5 which is saving artifacts as zip in automated way inside git repo so we don't need to do it manually AND we don't have to be tied to gitlab-ci
- Errors we see in SDC-be logs regarding decryption of auth header. Its probably caused by python-sdk.
 - Basically we call api with 2 Basic auth headers
 - update of the sdc-be image was done at the same time as the bug started appearing
 - Talk with [Micha Jagieo](#) on Monday

Changes:

- [Addition-Deletion PNF Support in Automation](#)
 - [API support for Upgrade Scenarios](#)
 - [Add sample-app as a test module with function of converting actn-model to customer OSS model](#)
-
