SO Pair Wise Testing for Jakarta Release

Below is the set of test cases (usually run manually) that we use for pair wise on SO, note that we are relying on Gating use case that do much of the below tests automatically to assess if SO is release ready

Pair Wise test with	Status	Notes
Health Check	PASS	Verified as part of the CSIT and
SDC	PASS	Verified with the latest images on the gating and CSIT
External API	NA	
UUI	PASS	Verified with the latest images on the gating and CSIT
SDNC	PASS	Verified with the latest images on the gating and CSIT
AAI	PASS	Verified with the latest images on the gating and CSIT
External	PASS	Simulator of External NSSMF and K8s for 5G Slicing and CNFO flows
