APPC M3 API Freeze Milestone Checklist (Amsterdan Release)

The following items are expected to be completed for the project to Pass the M3 API Freeze Milestone.

M3 Release Architecture Milestone overview is available in wiki.

ⓘ **Usage**

1. Use the "Copy" and "Move" options (available under the ..., top right of this page) to duplicate this template into your project wiki.
2. Fill out the Yes/No column
3. Provide link to evidence (when necessary)

Practice Area	Checkpoint	Yes /No	Evidences	How to?
Architecture	Has the Project team reviewed the APIs with the Architecture Committee (ARC)?	Yes	APPC Presentation	Architecture walkthrough to understand how each project contributes on Release Use Case. ARC to organize the walkthrough.
	Is there a plan to address the findings the API review?	N/A	See Note	**Note**: There were no findings coming out of the API review meeting; however, there is an item being addressed between MultiVIM and CDP-PAL around https support that needs to be resolved. CDP-PAL uses https, MultiVIM currently does not support it - both teams investigating to determine which solution would be most feasible in the short time we have. **Update 8-22-17**: Per CDP-PAL, they can support http, so at this stage, we have a plan forward.
	Does the team clearly understand that no changes in the API definition is allowed without formal TSC review and approval?	Yes	NA	In the case some changes are necessary, bring the request to the TSC for review and approval.
	Is there any changes in the scope, functionalities, deliverable, dependency, resources, API, repositories since M1 milestone?	Yes	If Yes, please a link to the evidence of these changes.	Two key items have increased the scope from what was understood at M1: 1. SDNC upgrade to Carbon ODL version: APPC-158 2. Integration with MultiVIM was originally anticipated to be a test-only activity for APPC with the impacts being mostly on CDP-PAL side; however, changes in URL format and AAI interface require development on APPC. APPC-123
	Provide link to the API Documentation.	Yes	R3 API Documents	
Release Management	Are committed Sprint Backlog Stories been marked as "Done" in Jira board?	Yes	Provide Link to Project backlog	APPC JIRA Board
	Are all tasks associated with Sprint Backlog Stories been marked as "Done" in Jira?	Yes		APPC JIRA Board
	Have all findings from previous milestones been addressed?	Yes	Provide link to JIRA findings	
Development	Has the project team reach the Automated Unit Test Code Coverage expectation? (Refer to artifacts available in Sonar)	No, work In-Pogress	Goal: 30-50% for Incubation project	Guidance on Code Coverage and Static Code Analysis Tools: Sonar
	Is there any pending commit request older than 36 Business hours in Gerrit?	No		
	Are all the Jenkins jobs successfully passed (Merge-Jobs)?	Yes	Provide link to evidence	APPC Gerrit
	Are all binaries available in Nexus?	Yes	Provide link to evidence	APPC Snapshot on Nexus
Integration and Testing	Have 50 % of System Integration Testing Use Cases been implemented successfully in Jenkins?	Yes	Provide link to evidence	APPC-104

Has the project code successfully passed the Daily Build process?	Yes		Goal is to ensure the latest project commit has not broken the Integration Daily Build
