This Page will show the Daily status of the ONAP master branch with info such as issues/WA/relevant info regarding the ONAP components - latest update now on [vCPE Integration Test Progress](#)

In this way we will be able to track the progress of all the Projects under ONAP, and to be able to solve issues faster while everyone is familiar with the latest issues and get info how to solve them with the info below.

For stabilizing the ONAP, we are considering [vFW use case](#) (Open loop) as a E2E flow. Below are the issues we are facing while we try to set up a stable environment to run the vFW use case successfully. Please observe the status info below regarding all ONAP (Heat based) components in Openstack.
