vCPE Homing Use Case

This document describes the Homing Template Specifications for residential vCPE. It is a work in progress and subject to frequent revision.

vCPE Service Model

Homing Policies and information sources relevant to the policies

Homing Workflow

Homing workflow in residential vCPE use case

NOTE:

- HAS is service-agnostic by design.
- Service specific parameters/constraints are inputs/encoded in policy

SO - HAS API (R) - before retrieving homing policies

SO - HAS API (R)
