

AAI RC1 Deliverables for Release Candidate Milestone Checklist

DRAFT PROPOSAL FOR COMMENTS

The following items are expected to be completed for the project to Pass the Release Candidate Milestone.

This template must be filled out for every Release Candidate Milestone (RC0, 1, 2, x)

[RC Release Candidate Milestone overview](#) is available in wiki.

Practice Area	Checkpoint	Yes /No	Evidences	How to?
Product Management	Are all tasks associated with the release been marked as "Done" in Jira?	No	0 issues Our outstanding issues revolve around updating documentation, versioning, and updating self-signed toy certificates.	
	Have all findings from previous milestones been addressed?	Yes	https://sonar.onap.org/	
Development	Have all Defects of priority Highest and High been in status "Done" in Jira?	No	4 issues	
	Are all JIRA issues used as a reference in a commit in status "Done" in Jira?	Yes	Some commits are pending that are blocked by the documentation project	Very often, some JIRA issue remains in status "Todo" in JIRA while the commit they are referenced to is successful.
	Is there any pending commit related to Highest and High priority issues older than 36 hours in Gerrit ? In case there are messages going back and forth between authors and reviewers, it is acceptable to be above 36 hours.	No		
	Are all the Jenkins jobs successfully passed (verify + merge jobs)?	Yes	https://jenkins.onap.org/view/Merge-Jobs/	
	Has the team delivered all their release artifacts in Nexus Release or Nexus Staging repo?	Yes, STAGING repo		Refer to Independent Versioning and Release Process for procedure
	There should be at least ONE version of each artifacts available in Nexus Release or Nexus Staging repo.			
Integration and Testing	Have all CSIT Use Cases (created by each project team) passed?	Yes	https://jenkins.onap.org/view/CSIT/	
	Is there a Docker images available for each repository?	Yes	https://nexus.onap.org:10001/	
	Has the project code successfully passed the Daily Build process?	Yes	https://jenkins.onap.org/view/aai/	Goal is to ensure the latest project commit has not broken the Integration Daily Build
Documentation	For RC0, for project delivering binaries, has the team populated and validated all the sections of either the Platform Component or SDK template?	In progress		Most teams have already created the high level file structures in readthedocs, and populated some actual documentation. However, the remaining sections of the appropriate template must be completed. Platform: A&AI, APP-C, CLAMP, CLI, DCAE, DMaaP, Holmes, MSB, OOM, Policy, Portal, SDN-C SDC, SO, UseCase UI, VFC, VID SDKs: AAF, CCSDK, External API Framework, Multi VIM/Cloud, VNFSDK
	For RC1, has the team addressed any issue (recorded in JIRA) provided by the Documentation team?	In progress	readthedocs . We have converted our wiki documentation to rst format. Added platform section to readthedocs. offered interfaces doc is deployed, release-notes section added, waiting for approval on this commit (PTL can't approve own commit):	
	For RC2, for project delivering binaries, has the team populated and validated all the sections of the Release Notestemplate?			
	For RC2, has the Documentation Team provided the final approval for your project documentation?
