Platform Maturity Requirements (S3P)

The Platform Maturity requirements are a set of non-functional requirements with the goal of improving the overall ONAP platform. The current areas covered include:

- Performance
- Stability
- Resiliency
- Security
- Scalability
- Manageability
- Usability

These requirements are also called S3P (Stability, Security, Scalability, Performance).

Beijing Release

Beijing's Platform Maturity Requirements: Platform Maturity Requirements (aka Carrier Grade)

The summary of priorities and levels are at Platform Maturity Level proposal 13Dec2017v2.pdf

Project status for Platform Maturity in Beijing: Beijing Release Platform Maturity

Casablanca Release
