OOM Meeting Notes - 2017-11-15

Agenda

- JIRA board - https://jira.onap.org/secure/RapidBoard.jspa?rapidView=41&view=planning&epics=visible
- OOM Amsterdam Readiness
  - Closing all Amsterdam bugs
  - OOM Amsterdam Release notes
- OPNFV PlugFest assistance Dec 4-8 - https://wiki.opnfv.org/display/EVNT/Plugfest+Planning+Page
- Discussion about the F2F in Dec 11-13 - https://lists.onap.org/pipermail/onap-discuss/2017-November/006274.html
- Demo: Continuous Delivery POC - https://wiki.onap.org/display/DW/Auto+Continuous+Deployment+via+Jenkins+and+Kibana
- Discuss commits including component committers - if aai or log component in OOM is modified - include developers from those projects in the review
  - Best practice: involve the component teams when there are impacts to other components.
  - OOM wants to become on the "best practices" side rather than implementing all OOM configs
- Discuss WIKI design pages for large stories/epics - JIRA Design Pages
- kubecon
- shay naeh OOM-63: deploying K8S using TOSCA is now available. Code will be committed on the Beining release
  - Next step will be to deploy ONAP applications through OOM on the TOSCA deployed k8s.
- David Sauvageau to figure out what is rquired to make sure the OOM code gets part of the release. Gildas Lanilis ?
- close all high bugs for A* release
- A* release notes required
- doc release notes required - Michael to arrange with doc team
- Borislav will be a committer when the TSC approval goes through
- verify vfc failing in heat as well for oom-19 oom-333
- OOM-311 update with so pass - passing for last 3 days - see http://jenkins.onap.info/job/oom-cd/123/console
- Michael check on vfc JIRAs - Discuss with Ran for HEAT status on these
- Michael recheck dcaegen2 status
- post link to vFW to meeting minutes - Running the ONAP Demos and ONAP on Kubernetes
- Post JIRA for generating config file per use use case -vVolte etc..
- OOM-324 - look at it for logging help
- Roger - Carrier Grade page updates - please review federation and upcoming diagrams
- Note: AT&T is looking at large deployments for above
- Discuss KubeCon assistance work - 3 pieces of work
- 8+ OOM F2F discussions - need to collaborate
- KubeCon mini summit available
- move JIRA design page to per project - OOM Design
- OOM-63 shay naeh (at SC- F2F) (alternate for rancher boostrap of K8s) - uses helm charts - need documentation link - getcloudify.org
- 1.1.0 branch - put major fixes only
- master continue committing as usual
- onap dockerhub images - should they migrate to nexus3?
- Discuss versioning work as part of global config - Mayank Gupta
- Discuss cloudify. helm, kubernetes - how they work together for Beijing - ie support hybrid environments
