

# 2018-02-09 AAI Weekly Meeting Notes

## Recordings

Recordings require host password

Attendees -

- [Tian Lee](#)
- [Pavel Paroulek](#)
- [William LaMont](#)
- [Shirley Morgan](#)
- [Vincent Scharf](#)
- [Venkata Harish Kajur](#)
- [William Reehil](#)
- [Arul Nambi](#)
- [Damian Nowak](#)
- [Kang Xi](#)
- [Reddy Prasad Vemani](#)
- [Olaf Burdziakowski](#)
- [Dileep Ranganathan](#)
- [Zi Li](#)
- [Bin Yang](#)
- [Rich Tabeledzki](#)
- [Harald Fuchs](#)
- [Ramu N](#)
- [Lina O'Connor](#)
- [Richard Epp](#)
- [Vivian Pressley](#)
- [Manisha Aggarwal](#)
- [Alexander Vul](#)
- [Steven Blimkie](#)
- [Sunitha Araveti](#)
- [Andrew Muller](#)
- [Asma Shaik](#)
- 

## Goals

- Get status on AAI lab resources
- Discuss MSB/AAF and establish clear direction on approach for Beijing
- Status on Cassandra clustering
- AAI Administrivia

## Discussion items

	New contributor to the AAI Portal project	Kang Xi <a href="#">xing_xiaocheng</a> Arul Nambi	Kang would like to introduce a new developer, XiaoCheng, to contribute to the AAI Portal project  XiaoCheng is interested in improving the A&AI portal to show the logical relationship among instances. Service to models, instances etc.  Has done code analysis of AAI  No impact to other components  Liaise with Arul Nambi  <a href="#">Arul Nambi</a> - would like to be included in planning/design/code submission. Please add as reviewer.
--	---	---	--

	CII Badging	James Forsyth  Arul Nambi	<p>Wiki page with instructions on the process: <a href="#">CII Badging Program</a></p> <p>We have two CII Badging submissions currently active on <a href="#">CII Best Practice Badge Program</a>: 1) <a href="#">AAI</a> and 2) <a href="#">Sparky-fe</a></p> <p>The team needs to decide how to split up the project - AAI is too big to fit under a single project. <a href="#">James Forsyth</a> proposes the following breakdown for CII badging:</p> <ol style="list-style-type: none"> <li>1) AAI core (REST providers and common code): <a href="#">James Forsyth</a> - Project created, ongoing progress.       <ul style="list-style-type: none"> <li>• aai-common</li> <li>• aai-resources</li> <li>• aai-traversal</li> <li>• gizmo</li> <li>• champ</li> <li>• aai-config</li> <li>• aai-data</li> </ul> </li> <li>2) GUI - <a href="#">Arul Nambi</a> - Need to include more repos to the current "front-end" project       <ul style="list-style-type: none"> <li>• sparky-fe</li> <li>• sparky-be</li> <li>• data-router</li> <li>• search-data-service</li> <li>• router-core</li> </ul> </li> <li>3) Model loader - <a href="#">Tian Lee</a> - Need to create projects       <ul style="list-style-type: none"> <li>• model-loader</li> <li>• babel</li> </ul> </li> <li>4) Graph utils / eventing / logging - <a href="#">Steven Blimkie</a> - Need to create projects       <ul style="list-style-type: none"> <li>• spike</li> <li>• gap - <a href="#">Tian Lee</a></li> <li>• graphadmin</li> <li>• graphgraph - Stretch for Beijing</li> <li>• event-client - <a href="#">Tian Lee</a></li> <li>• rest-client</li> </ul> </li> <li>5) ESR - <a href="#">Zi Li</a> - Project is created, still ongoing process to meet all the requirements       <ul style="list-style-type: none"> <li>• esr-gui</li> <li>• esr-server</li> </ul> </li> </ol> <p>The idea is that we assign one key person who will be responsible for getting the badge on their set of repos. This is just a suggestion, and I invite discussion, re-categorization, and complete rewrites.</p>
	blocked URLAAI-494 - Improve API Swagger Documentation	IN PROGRESS	<p><b>Issue 1 - Parsing of YAML file into RST format</b></p> <p><a href="#">Richard Epp</a> to send yaml file via email to Pavel and attach to wiki so all can see.</p> <p>YAML file too large and resulting RST file cannot be read by readmedoc causing it to be unusable.</p> <p>Issues parsing the YAML file into RST format - structure is not correct - structure of YAML file must follow SWAGGER structure.</p> <p><b>Issue 2 - Exposing AAI Swagger through MSB</b></p> <p>Suggestion of using MSB portal with link of file to readmedoc.</p> <p>How to display REST APIs via the swagger UI integrated with MSB: <a href="https://wiki.onap.org/display/DW/Microservice+Bus+API+Documentation#MicroserviceBusAPIDocumentation-APIDefinitionandSwagger-UI">https://wiki.onap.org/display/DW/Microservice+Bus+API+Documentation#MicroserviceBusAPIDocumentation-APIDefinitionandSwagger-UI</a></p> <p>Will need to continue as open item until resolved.</p> <p>Contact <a href="#">Zi Li</a> / <a href="#">HuabingZhao</a> for more information about integration. Just require the swagger JSON file for integration - <a href="#">Richard Epp</a> please provide the JSON to <a href="#">Zi Li</a> -</p> <p><a href="https://wiki.onap.org/display/DW/2018-02-02+AAI+Weekly+Meeting+notes?preview=%2F25429783%2F25432551%2FNetwork_v13.yaml">https://wiki.onap.org/display/DW/2018-02-02+AAI+Weekly+Meeting+notes?preview=%2F25429783%2F25432551%2FNetwork_v13.yaml</a></p> <p><a href="#">Zi Li</a> - please download the yaml file above and see if you can make use of it in MSB</p> <p>Note: Alternate Swagger UI service already available.</p>

	Jenkins	Venkata Harish Kajur	<p>Release jenkins jobs are still failing. Helpdesk ticket # 52082</p> <p>Changes to AAI-COMMON not picked up by downstream projects (resources, traversal)</p> <p>Unable to release aai-common, as cannot release multiple times, without incrementing the version.</p> <p>Liasing with ONAP helpdesk about whether we can release multiple minor versions of an artifact.</p> <p>Proposal for Monday PTL meeting to align SNAPSHOT strategy</p> <p><a href="#">Venkata Harish Kajur</a> to include <a href="#">Steven Blimkie</a> on email exhange with ONAP Help desk.</p>
	HPA	Dileep Ranganathan	<p>I would like to discuss about the Persistence of HPA related information in A&amp;AI in the weekly meeting call.</p> <p>I would like to discuss my proposal to capture the HPA capabilities in a generic way in A&amp;AI as represented here à <a href="https://wiki.onap.org/display/DW/Persistence+of+HPA+related+information+in+AAI">https://wiki.onap.org/display/DW/Persistence+of+HPA+related+information+in+AAI</a></p> <p>I would appreciate if we could include this in tomorrow's meeting.</p> <p><a href="#">Dileep Ranganathan</a> presented <a href="https://wiki.onap.org/display/DW/Persistence+of+HPA+related+information+in+AAI">https://wiki.onap.org/display/DW/Persistence+of+HPA+related+information+in+AAI</a>. General discussion.</p> <p><a href="#">Alexander Vul</a> met with OAF team yesterday to determine optimal way to consume info from A&amp;AI, will go back To OAF with using key value pairs; implementation needs to be agnostic and optimal.</p> <p>Alex to post on wiki general format and value specifics; will meet with OAF on Mon on how to represent the values.</p> <p><a href="#">Alexander Vul</a> to review changes with Christina for specific schema proposal</p> <p>Functional requirements for HPA : <a href="https://wiki.onap.org/display/DW/Hardware+Platform+Enablement+In+ONAP">https://wiki.onap.org/display/DW/Hardware+Platform+Enablement+In+ONAP</a></p>
	MSB Integration Status	HuabingZhao	<p>The MSB AAF auth plugin</p> <p>Two-way SSL at MSB API Gateway</p> <p>Any problems in the integration</p> <p><a href="#">blocked URL</a>AAI-671 - Replace HAProxy with MSB <a href="#">OPEN</a> Opened questions to be answered</p> <p>Might need a plugin in MSB to achieve stickiness of requests</p> <p>Huabing asked Jonathan Gathman about AAF API - further details required.</p>
	Cassandra Clustering	Pavel Paroulek  Venkata Harish Kajur	<p><b>Goal - provide HA to AAI</b></p> <p><b>Issue 1 - remote storage</b></p> <p>Meetings with <a href="#">Michael O'Brien</a> - (deprecated as of 20170508) - use obrienlabs</p> <p>OOM team should check the video recording of the session</p> <p>@michaelobrien will arrange further meeting on Monday</p> <p><b>Issue 2 - simulating outage</b></p> <p>Pavel + Harish will try to simulate on Monday</p> <p>We have a 3 node replicated cluster configured with local storage; need to discuss if this will be adequate to the purpose of Beijing integration testing.</p> <p><a href="#">blocked URL</a>AAI-539 - Set up Cassandra docker images in 3 node cluster <a href="#">OPEN</a> <a href="#">blocked URL</a>OOM-591 - AAI needs persistent volumes configured, need help with OS in lab <a href="#">REOPENED</a></p> <p><a href="#">Michael O'Brien</a> from OOM team will assist w/ OOM-591</p> <p><a href="#">Michael O'Brien</a> to respond back to Harish's email and setup meeting on Monday 10 AM; Will put on OAM discussion page so others interested can attend.</p> <p><a href="https://lists.onap.org/pipermail/onap-discuss/2018-February/007954.html">https://lists.onap.org/pipermail/onap-discuss/2018-February/007954.html</a></p> <p><a href="https://lists.onap.org/pipermail/onap-discuss/2018-February/007955.html">https://lists.onap.org/pipermail/onap-discuss/2018-February/007955.html</a></p> <p>ONAP on Kubernetes on Windriver Titanium Cloud - Openlab#Openlab-20180205: AAIandOOMworkingsessiononCINDERKubernetesPV</p> <p><a href="https://wiki.onap.org/download/attachments/25431372/20180205_aai_oom_cinder_kubernetes_pv_work_session_1_of_2_zoom_0.mp4?version=1&amp;modificationDate=1517867225191&amp;pi=v2">https://wiki.onap.org/download/attachments/25431372/20180205_aai_oom_cinder_kubernetes_pv_work_session_1_of_2_zoom_0.mp4?version=1&amp;modificationDate=1517867225191&amp;pi=v2</a></p>
	Event-Client	Tian Lee	Auto-generated build jobs failing. Tian will investigate - update next week.

## Action items

- [Zi Li](#) or other ESR rep will to start the CII Badging process for ESR <https://bestpractices.coreinfrastructure.org/>
- James Forsyth will set up a session with AAF to try authentication
- James Forsyth to look at AAI-671 to provide comments/clarifications back to Adrian Slavkovsky
- Rich Epp to send yaml file via email to Pavel Paroulek and attach to wiki so all can see.
- [Alexander Vul](#) to post on wiki general format and value specifics; will meet with OAF on Mon on how to represent the values.
- Michael O'Brien to respond back to Venkata Harish Kajur's email and setup meeting on Monday 10 AM; Will put on OAM discussion page so others interested can attend.

- James Forsyth - Arul Nambi - would like to be included in planning/design/code submission. Please add as reviewer.
- [Richard Epp](#) to work with [Zi Li](#) on integration between Swagger and MSB using swagger.json
- [Venkata Harish Kajur](#) to add [Steven Blimkie](#) to email exchange on ONAP Help desk issue with Jenkins
