

# Usecase-UI Security/Vulnerability Threat Analysis

This template is intended to be used to document the outcome of the impact analysis related to the known vulnerability reported by Nexus-IQ (CLM tab in Jenkins). Nexus-IQ can identify the known vulnerabilities contained in the components use by onap components.

This table will be presented to TSC at Code Freeze milestone (M4) to the TSC.

It is recommended to **first update to the latest version** of the third party components available. In case the latest third party components still reports some vulnerabilities, you must provide an impact analysis as illustrated in the example below.

In the case where you have nested third party components (a third party component embedding another third party component) and there is **NO CVE** number for the upstream third party component (meaning the third party component you are embedding), it is recommended to open a vulnerability issue on the upstream third party component.

The following table is addressing 2 different scenarios:

- Confirmation of a vulnerability including an action
- False Positive

Repository	Group	Impact Analysis	Action
usecase-ui	angular1.4.8	There is no non vulnerable version of this component.	
usecase-ui	com.eclipsesource.jaxrs	False positive. Explanation: usecase-ui is not using this dependency jar file. There is not path of usecase-ui-1.1.0-SNAPSHOT.	Contact helpdesk to make usecase-ui-1.1.0-SNAPSHOT. <input checked="" type="checkbox"/> <b>USECASEUI-105</b> - There is not path of usecase-ui-1.1.0-SNAPSHOT. <span>CLOSED</span>
usecase-ui	com.fasterxml.jackson.core	False positive. Explanation: usecase-ui is not using this dependency jar file. There is not path of usecase-ui-1.1.0-SNAPSHOT.	Contact helpdesk to make usecase-ui-1.1.0-SNAPSHOT. <input checked="" type="checkbox"/> <b>USECASEUI-105</b> - There is not path of usecase-ui-1.1.0-SNAPSHOT. <span>CLOSED</span>
usecase-ui	com.fasterxml.jackson.core	False positive. Explanation: usecase-ui is not using this dependency jar file. There is not path of usecase-ui-1.1.0-SNAPSHOT.	Contact helpdesk to make usecase-ui-1.1.0-SNAPSHOT. <input checked="" type="checkbox"/> <b>USECASEUI-105</b> - There is not path of usecase-ui-1.1.0-SNAPSHOT. <span>CLOSED</span>
usecase-ui	commons-beanutils	False positive. Explanation: usecase-ui is not using this dependency jar file. There is not path of usecase-ui-1.1.0-SNAPSHOT.	Contact helpdesk to make usecase-ui-1.1.0-SNAPSHOT. <input checked="" type="checkbox"/> <b>USECASEUI-105</b> - There is not path of usecase-ui-1.1.0-SNAPSHOT. <span>CLOSED</span>
usecase-ui	commons-collections	False positive. Explanation: usecase-ui is not using this dependency jar file. There is not path of usecase-ui-1.1.0-SNAPSHOT.	Contact helpdesk to make usecase-ui-1.1.0-SNAPSHOT. <input checked="" type="checkbox"/> <b>USECASEUI-105</b> - There is not path of usecase-ui-1.1.0-SNAPSHOT. <span>CLOSED</span>
usecase-ui	commons-httpclient	There is no non vulnerable version of this component.	
usecase-ui	org.eclipse.jetty	False positive. Explanation: usecase-ui is not using this dependency jar file. There is not path of usecase-ui-1.1.0-SNAPSHOT.	Contact helpdesk to make usecase-ui-1.1.0-SNAPSHOT. <input checked="" type="checkbox"/> <b>USECASEUI-105</b> - There is not path of usecase-ui-1.1.0-SNAPSHOT. <span>CLOSED</span>
usecase-ui	org.freemarker	False positive. Explanation: usecase-ui is not using this dependency jar file. There is not path of usecase-ui-1.1.0-SNAPSHOT.	Contact helpdesk to make usecase-ui-1.1.0-SNAPSHOT. <input checked="" type="checkbox"/> <b>USECASEUI-105</b> - There is not path of usecase-ui-1.1.0-SNAPSHOT. <span>CLOSED</span>

usecase-ui	org.hibernate	False positive.  Explanation: usecase-ui is not using this dependency jar file. There is not path of usecase-ui-1.1.0-SNAPSHOT.	Contact helpdesk to make usecase-ui-1.1.0-SNAPSHOT.  <input checked="" type="checkbox"/> <a href="#">USECASEUI-105</a> - There is not path of usecase-ui-1.1.0-SNAPSHOT. <input type="button" value="CLOSED"/>
usecase-ui	org.springframework	False positive.  Explanation: usecase-ui is not using this dependency jar file. There is not path of usecase-ui-1.1.0-SNAPSHOT.	Contact helpdesk to make usecase-ui-1.1.0-SNAPSHOT.  <input checked="" type="checkbox"/> <a href="#">USECASEUI-105</a> - There is not path of usecase-ui-1.1.0-SNAPSHOT. <input type="button" value="CLOSED"/>
usecase-ui	org.springframework	False positive.  Explanation: usecase-ui is not using this dependency jar file. There is not path of usecase-ui-1.1.0-SNAPSHOT.	Contact helpdesk to make usecase-ui-1.1.0-SNAPSHOT.  <input checked="" type="checkbox"/> <a href="#">USECASEUI-105</a> - There is not path of usecase-ui-1.1.0-SNAPSHOT. <input type="button" value="CLOSED"/>
usecase-ui-server	mysql	False positive.  Explanation: Spring-Boot Framework includes this compoment.  This vulnerability issue is an indirect dependency introduced by usecase-ui-server.	
usecase-ui-server	ch.qos.logback	False positive.  Explanation: Spring-Boot Framework includes this compoment.  This vulnerability issue is an indirect dependency introduced by usecase-ui-server.	
usecase-ui-server	com.eclipsesource.jaxrs	False positive.  Explanation: Spring-Boot Framework includes this compoment.  This vulnerability issue is an indirect dependency introduced by usecase-ui-server.	
usecase-ui-server	com.fasterxml.jackson.core	False positive.  Explanation: Spring-Boot Framework includes this compoment.  This vulnerability issue is an indirect dependency introduced by usecase-ui-server.	
usecase-ui-server	org.apache.httpcomponents	False positive.  Explanation: Spring-Boot Framework includes this compoment.  This vulnerability issue is an indirect dependency introduced by usecase-ui-server.	
usecase-ui-server	org.apache.tomcat.embed	False positive.  Explanation: Spring-Boot Framework includes this compoment.  This vulnerability issue is an indirect dependency introduced by usecase-ui-server.	
usecase-ui-server	org.eclipse.jetty	False positive.  Explanation: Spring-Boot Framework includes this compoment.  This vulnerability issue is an indirect dependency introduced by usecase-ui-server.	
usecase-ui-server	org.hibernate	False positive.  Explanation: Spring-Boot Framework includes this compoment.  This vulnerability issue is an indirect dependency introduced by usecase-ui-server.	
usecase-ui-server	org.springframework	False positive.  Explanation: Spring-Boot Framework includes this compoment.  This vulnerability issue is an indirect dependency introduced by usecase-ui-server.	

usecase-ui-server	org.springframework.data	<p>False positive.</p> <p>Explanation: Spring-Boot Framework includes this compoment.</p> <p>This vulnerability issue is an indirect dependency introduced by usecase-ui-server.</p>	
usecase-ui-server	org.springframework.data	<p>False positive.</p> <p>Explanation: Spring-Boot Framework includes this compoment.</p> <p>This vulnerability issue is an indirect dependency introduced by usecase-ui-server.</p>
