Standard Life-Cycle Operations

Target release	Casablanca
Epic	
Document status	DRAFT
Document owner	Srinivasa Vellanki
Designer	
Developers	
QA	

Goals

- Enable Designers(Service Designer, VNF Owner or TechOps) to be able to specify the Service, NF(VNF & PNF) and Network Lifecycle Operations

Background and strategic fit

Assumptions

- .

Requirements

#	Title	User Story	Importance	Notes
1	Output Parameters for Operations	As a Service Designer I should be able to specify the Output Parameters of Operations	Must Have	
2	Service Operations	As a Service Designer I should be able to specify the Operations supported by a Service	Must Have	
3	VNFC Operations	As a Service Designer I should be able to specify the Operations supported by a VNFC	Must Have	
4	PNF Operations	As a Service Designer I should be able to specify the Operations supported by a PNF	Nice to Have	
5	Network Operations	As a Service Designer I should be able to specify the Operations supported by a Network	Nice to Have	
6	Assign Workflows	Assign a predefined workflow to an Operation to enable re-use of workflows	Must Have	
7	Certify Service Operations	As part of Service certification, verify if all the Inputs and Outputs of the Operations are mapped	Must Have	
8	Certify VNF Operations	As part of VNF certification, verify if all the Inputs and Outputs of the Operations are mapped	Must Have	
9	Certify VNFC Operations	As part of VNF certification, verify if all the Inputs and Outputs of the VNFC Operations are mapped	Must Have	

User interaction and design

Questions

Below is a list of questions to be addressed as a result of this requirements document:

Question	Outcome
Do we need to support Network Operations? Are there any other operations other than Create and Delete?	

Not Doing
