

OOM Meeting Notes - 2018-06-06

Notes

- Beijing Branch
 - Strategy: cutting branch today 20180606 (changes before only for image changes)
 - Issue with : <https://gerrit.onap.org/r/#/c/50587/> (hc ok, will retest - may merge the 32-11 nodeport change)
 - Change management: patches after the branch? INT team will pickup a dot release if possible (containing the patches)
 - (discussion on dot release : Mike, Frank,
 - - release not fully stable anyway - dependency in 2 parts (oom chart changes and project config/code changes in re-released docker images)
- Mikes values.yaml overrides for production deployments -

 **OOM-927** - Need a production grade configuration override file of ONAP deployment CLOSED
- Working with LF to get centralized helm chart repository - no more make or clone commands locally - just helm install
 - Could use combination of LF repo and local repo
- go over bugs
 - <https://gerrit.onap.org/r/#/c/48093/>
 - AAF startup issue
- <https://gerrit.onap.org/r/#/q/status:open+project:+oom>
- Q) appc issues: High: [Aaron Hay](#)

 **OOM-1124** - Update OOM APPC chart to enhance AAF support CLOSED

 - config gets reset in workaround - pushing review to casablanca - <https://gerrit.onap.org/r/50409>
 - without change above - need to apply odl config changes outside of a helm upgrade
 - can cherry pick to the branch
 - Need to discuss change management for beijing
- Q) AAF integration (SDC, AAI and Logging implementors so far)
- SO is passing only windriver periodically - failing in tlab and aws
- Talk to seshu on <http://jenkins.onap.info/job/oom-cd-master/3103/console>
