

# 07-30-2018 VF-C Weekly Meeting

## Agenda:

- SOL003 and Stand-alone DB Microservice contribution summarize OOF(5min).
- Release calendar?identity important milestone deadline(5min).
- VFC connet to OOF (Huang Haibin 30 mins) .
- Data model bug introduction (Huang Haibin 20mins, postpone to next meeting) .

## Attendees:

Huang Haibin, hanyanan, Jinhua FU, Liuskyter, maopeng, mingzhang li, ruoyu ying,Shobana,Yan, TR00568434

## Recording:

vfc-meeting-2018-7-30.mp4

## Minutes:

### 1.SOL003 and Stand-alone DB Microservice contribution summarize OOF

Identified all subtasks about above two task, zte and verizon will collaborate to contribute these two task.

### 2.Release calendar?identity important milestone deadline?5min?.

M3 API freeze(2018/8/23)

M4 code freeze(2018/9/20)

### 3. VFC connet to OOF (Huang Haibin 30 mins) .

ONAP-VFC-OOF.pptx

Haibin and ruoyu introduce the overall design about how VFC integrates with OOF.

Q: The design only mentioned about gynfm , need to consider the svnfm scenario

Q: About two callback proposal, there is no difference for Async and sync, but the callback url should be nslcm

Q: OOF output and input parameters, how OOF to know the allocation requiremnets

The overall design has been known ,but more details need discuss offline

**Action:**

1. The OOF integration details need to be discussed
2. If the task haven't started, task owner should start to work right now to catch up the following milestones
