Attendees

Huabing Zhao

Bo Lv

Zi Li

Bin Yang

Discussion items:

Review progress of work in current sprint	Huabing Zhao	
Istio mutual TLS authentication and RBAC authorization	Huabing Zhao	- We have been able to enable mutual TLS authentication for MSB Multicloud and VF-C. - RBAC authorization rules were created for Multicloud services access control - K8s liveness probe need to be disabled to enable Istio authentication, a workaround for that is replacing HTTP liveness probe with curl command. More about Istio TLS authentication and RBAC can be found ad this wiki page: Manage ONAP Microservices with Istio Service Mesh-Mutual TLS Authentication Enabled
