

Logging Pair Wise Testing for Casablanca Release

 ~~LOG-770~~ - Pairwise testing for Casablanca CLOSED

2 Types of test - Logs make it to the ELK stack, and logs are using the current spec library

pending: documentation, security waivers continued...

The ELK stack tests - are all or nothing - as in if the log-ls service on my end is up for AAI is is up for CLAMP as well for example

ONAP deployment Model

Diagram not yet complete - i am in the M's

Component Tests
