

SO Pair Wise Testing for Casablanca Release

Project Name	OOM	Notes
Health Check	OK	
SO SDNC	Pass	VNF-API Pass vFW Usecase deployed on OOM
SO AAI	Pass	Integration team could proceed with the test vFW Usecase deployed on OOM
SO LOG (ELK)	in-Progess	<p>☒ SO-1110 - Re-add Filebeat sidecars to SO after 2-9 container refactor CLOSED</p>
SO Multi cloud	Pass	<p>Tested on OOF pod - vFW Create/Query/Delete have been performed successfully in the OOF pod. vFW Create tested with oof_directives - verified that flavor was replaced in Multicloud before stack instantiation.</p> <p>Solved issues:</p> <p>☒ SO-1124 - Produce correct json body in multicloud adapter CLOSED</p> <p>☒ SO-1139 - CloudSiteId and TenantId parameters swapped in multicloud DELETE CLOSED</p> <p>☒ SO-1142 - Incorrect instance name returned for multicloud heat vfmodule create CLOSED</p>
SO VFC (deploy)	Pass	
SO SDC	Pass	
SO OOF	Pass	<p>Resolved: BLOCKED due to OOF/MUSIC Issues (We attempted to use OOF/OSDF without HAS/MUSIC)</p> <p>10/16 Tried updated OOM charts for Music/OOF - still seeing issues with pods initializing, have OOF team members troubleshooting</p> <p>10/17 OOF pods are now coming up using a workaround for aaf-sms issue, however healthcheck is not passing, OOF team members are investigating. We are planning on sending some homing request from SO to OOF later in the day, once this issue is fixed and OOF is configured.</p> <p>10/19 OOF team has resolved blocker and setup simulators to interface with OSDF. This should enable SO to test SO/OOF interface. Testing Resumes and will be updated today with results.</p> <p>Resolved: BLOCKED due to "IP Pool for VPN Connections in the Integration Lab" Issue: https://lists.onap.org/g/onap-discuss/message/13041</p> <p>10/22 I was able to send a homing request for vFW from SO and receive a homing solution from OOF. Moving pairwise to pass. Since OOF (OSDF) is mocking communication with policy/HAS/AI etc. testing of a real solution will resume in integration test when OOF is completely functional.</p> <p>Tested in OOF project of pod-onap-01</p> <p>Solved Issues: ☒ SO-1121 - Processing UserInput in prepareCreateServiceInstance Exception CLOSED</p> <p>☒ SO-1127 - Fix OOF Homing Config in overrides and OOM CLOSED</p> <p>Issues In Progress:</p> <p>☒ SO-1145 - Java Exception in Homing CLOSED</p>
SO VID	Pass	VNF API - Pass vFW Usecase deployed on OOM
