2018-09-21Meeting notes

Date

21 Sep 2018 10AM EDT

To Join: https://zoom.us/j/287367106

Discuss

- Introductions
- Update: VNF Requirements Outline for TOSCA VNF Package Andy Mayer
    - see progess: Casablanca R3: TOSCA VNFD Requirements Draft
- Update: TOSCA Orchestration in ONAP Topic (need to discuss in architecture) Alexander Vul

Prior notes:

- VNF Requirements Outline for TOSCA VNF Package Andy Mayer
    - Requirements should be tied to platform support for the current release
    - May use "objectives" for future looking capabilities that do not interfere with platform in current release
    - May use "guidelines" section to describe future capabilities without specific requirements.
    - Focus is on Casablanca platform support.
    - Need developers guide addendum (based on SOL001)
    - Use VNF SDK to provide guidance
    - Some manual on-boarding will still be necessary
    - Need to describe limitations in Introduction of guidelines Thinh Nguyenphu
    - CSAR section Andrei Kojukhov
    - TOSCA SDC Section Andy Mayer
    - HPA Alexander Vul
    - VES Alok Gupta (See guidelines section 7.4)
    - Andy Mayer will create wiki page
    - Need initial content by M4 (stable outline and numbered requirements, can bug fix and work informative text afterwards)
- TOSCA Orchestration in ONAP Topic (need to discuss in architecture)
    - Cloudify orchestration will no longer be used.
    - ONAP needs one single TOSCA Parser
    - Need to decide on how SO will perform TOSCA Parsing and Orchestration
    - This topic needs to further discussion in the Architecture Sub-committee
    - Agree on single format of VNF Package and Descriptor
    - Alexander Vul to put together problem statement
    - F2F end of October Arch meeting at IBM in Montreal (29 and 30th)
