

CDS integration meeting notes

10/3/18 - Minutes

Participants: [Takamune Cho](#), David Ho, [Yuriy Malakov](#), Simon Ng@att, Mita Dedhiya@att. Jogs Vidya@att

Minutes:

Yuriy briefly described blueprint and Data Dictionary: [Controller Design Studio Initiative](#), [CCSDK Dublin Controller Design Studio Initiative](#)

1/21/19 - Minutes

Participants: Soumendu@TechM, Swaplani@techM, Patrick@ATT, [Takamune Cho](#) Simon Ng@att, Mita Dedhiya@att.

- The Data Dictionary implementation in CDT GUI
 - The data for Data Dictionary will be read from Data Dictionary microservice API that resides on ccscdk/apps
 - The data for Data Dictionary will be stored in APPC/SDNC database via dblib odl bundle. The data will be stored in a separate table
- the meeting will be held a weekly quick sync up meeting.

1/28/19 - Minutes

Participants: Soumendu@TechM, Patrick@ATT, [Takamune Cho](#) Simon Ng@att, Mita Dedhiya@att. [Yuriy Malakov](#)

- Taka presented how the code works for sending design-request with payload from CDT GUI to APPC runtime.

Mita requested for a presentation for VNF post instantiation example of how to use CDS teamplate and the data collection works.

2/4/19 - Cancelled
