VFC could ignore that error. To ignore that error, we need either apply the patch at https://jira.opnfv.org/browse//PARSER-187 locally in nfv-toscaparser which VFC uses or wait for nfv-toscaparser got that fixed.  The output vnt package from SDC is not ETSI alignment, we just use the standard package under Artifact/Deployment /OTHERS directory  VF-C would like SDC can support export ETSI standard VNF and NS package  100%  One simple Service with simple VCPE vnt has been created successfully  MULTICLOUD-404 - Openstack return value is consistent with our code CLOSED  MULTICLOUD-404 - Openstack user data import fail CLOSED  MULTICLOUD-407 - Openstack user data import fail CLOSED  MULTICLOUD-407 - Openstack user data import fail CLOSED  MULTICLOUD-408 - Metadata format is not right CLOSED  MULTICLOUD-408 - Openstack user data import fail CLOSED  MULTICLOUD-407 - Openstack user data import fail CLOSED  MULTICLOUD-408 - Openstack user data import fail CLOSED  Multicloud-407 - Openstack user data import fail CLOSED  Multicloud-408 - Openstack user data import fail CL	T203		100%	'artifacts' definition is missing in the exported csar's VDU node ,because SDC postpone this to Dublin release, we only
Creation    MULTICLOUD-405 - Metadata format is not right CLOSED     MULTICLOUD-404 - Openstack return value is consistent with our code CLOSED     VFC-1188 - Encode user data by base64 CLOSED     MULTICLOUD-407 - Openstack user data import fail CLOSED     VFC-1193 - Get flavor Id from OOF CLOSED     SO-1235 - SO bpmn execution error CLOSED     when updating the SO images in vCPE env. And the error is the same     Because SO can't work now , we use UUI to trigger the NS lifecycle management     SO-1239 - SO API doesn't register to MSB CLOSED     vCPE service with five vCPE vnfs have been created successfully     T303	T301	VF-C Tosca parser	100%	VFC could ignore that error. To ignore that error, we need either apply the patch at https://jira.opnfv.org/browse //PARSER-187 locally in nfv-toscaparser which VFC uses or wait for nfv-toscaparser got that fixed.  The output vnf package from SDC is not ETSI alignment, we just use the standard package under Artifact/Deployment //OTHERS directory
Termination vCPE Service with five vCPE vnfs have been terminated successfully	T302		100%	MULTICLOUD-404 - Openstack return value is consistent with our code CLOSED  VFC 1188 - Encode user data by base64 CLOSED  MULTICLOUD 407 - Openstack user data import fail CLOSED  VFC 1193 - Get flavor ld from OOF CLOSED  SO-1235 - SO bpmn execution error CLOSED  when updating the SO images in vCPE env. And the error is the same  Because SO can't work now , we use UUI to trigger the NS lifecycle management  SO-1239 - SO API doesn't register to MSB CLOSED
