

Casablanca ExtAPI Security/Vulnerability Report

This table represents the known exploitable and non-exploitable vulnerabilities in third party packages used in the project.

| Repository | Group | Impact Analysis | Action |
|-----------------|--|--|--|
| externalapi/nbi | com. fasterxml. jackson. core | <p>False Positive.</p> <p>The exploit primarily is about enabling polymorphic type handling with the object mapper and writing class specifics into the JSON object. There are two ways of doing this:</p> <ol style="list-style-type: none">1. <code>ObjectMapper.enableDefaultTyping()</code>2. <code>@JsonTypeInfo</code> for marshalling / unmarshalling an object <p>By default the ObjectMapper does not <code>enableDefaultTyping</code>, the code base is not using either approach, so the possibility of the exploit vector does not apply.</p> | N/A |
| externalapi/nbi | common- s- beanutils | <p>No impact:</p> <p>Beanutils is ONLY manipulated for outgoing serialization purpose, to filter json node to populate http response with json.</p> <p>Beanutils is not used on input data or exposed as is to external client</p> | <p>N/A</p> <p>Note: 1.9.3 is the latest released but still not fix the listed vulnerability.</p> <p>We tried to use some other frameworks but only beanutils has some key features we can not miss, to filter json response data. Avoiding commonsbeanutils means an important re write of the code with other opened risk for sure.</p> |
| externalapi/nbi | dom4j | <p>No impact:</p> <p>Dom4j is manipulated internally by hibernate 5.0.2 which is used by spring-boot-starter-data-jpa</p> | <p>N/A</p> <p>Note:</p> <p>The threat level moved from 6 to 7 between 09/19 and 11/05</p> <p>Try to force dom4j 2.x, or plan an upgrade of externalapi to a more recent version of springboot</p> |
| externalapi/nbi | org. apache. tomcat. embed | <p>No impact:</p> <p>Tomcat-embed-websocket is coming with spring-boot-starter-web 1.5.12 but websocket are not active on externalapi</p> | <p>N/A</p> <p>Note:</p> <p>The threat level moved from 6 to 7 between 09/19 and 11/05</p> <p>Try to exclude tomcat-embed-websocket from import.</p> <p>Try to force tomcat 9.0.12 or plan an upgrade of externalapi to a more recent version of springboot compatible with tomcat 9.0.12</p> |
| externalapi/nbi | com. google. guava | <p>No impact</p> <p>Guava is coming with org.onap.msb.java-sdk:msb-java-sdk, used internally for externalapi registration on msb.</p> | <p>N/A</p> <p>Note:</p> <p>Update to msb-java-sdk from 1.1.0 to 1.2.0 should remove the alert as 1.2.0 does not have any alert on this.</p> |
| externalapi/nbi | org. apache. tomcat. embed | <p>No impact</p> <p>tomcat-embed-core is coming with spring-boot-starter-web 1.5.12, but externalapi doesn't use any directory redirection.</p> | <p>N/A</p> <p>Note:</p> <p>Try to force tomcat 9.0.12 or plan an upgrade of externalapi to a more recent version of springboot compatible with tomcat 9.0.12</p> |
| externalapi/nbi | org. springfra mework | <p>No impact: Stomp is not active on externalapi</p> | <p>N/A</p> <p>See https://pivotal.io/security/cve-2018-1257</p> |
| externalapi/nbi | org. springfra mework | <p>No impact; application doesn't serve static resources or use <code>org.springframework.core.io.Resource</code></p> | <p>N/A</p> <p>See https://pivotal.io/security/cve-2018-15756</p> |
| externalapi/nbi | org. springfra mework | <p>No impact: HiddenHttpMethodFilter is not used</p> | <p>N/A</p> <p>See https://pivotal.io/security/cve-2018-11040</p> |
| externalapi/nbi | org. springfra mework | <p>No impact: MappingJackson2JsonView is not used</p> | <p>N/A</p> <p>See https://pivotal.io/security/cve-2018-11040</p> |

| | | | |
|-----------------|-----------------------------|--|--|
| externalapi/nbi | org. springfra mework | No impact: MappingJackson2JsonView is not used | N/A See https://pivotal.io/security/cve-2018-11040 |
