BBS JIRA Issues

i The Epics and Stories generated for the BBS Use Case should use one or more of the following labels:

- "BBS: Topology Discovery" (Used for issues related to the discovery and synchronization of the Broadband Service elements)
- "BBS: HSIA Service" (Used for lifecycle issues related to the lifecycle of a HSIA service (creation, activation, deletion))
- "BBS: Nomadic ONT" (Used for issues related to the registration and re-registration of the ONT; RG Activation)

All labels for BBS stories and epics should be pre-pended with "BBS: "As more functionality is added to the BBS Use case new labels are expected to be defined. These labels can be used as filters for looking at the work effort related to BBS.
