Casablanca Modeling Security/Vulnerability Report

This table represents the known exploitable and non-exploitable vulnerabilities in third party packages used in the project.

Repository	Group	Impact Analysis	Action
modeling /toscaparsers	**modeling-toscaparsers-javatoscachecker**	There are 2 tosca parsers in this repo, VFC is calling nfvparser which doesn't have vulnerabilities issue, only javatoscachecker has, but there is no any project in ONAP call to this function, so won't have any impact.	No Action
