

January 21, 2019

1. We reviewed several use cases/functional requirements with Yang (Integration team PTL). The objective was to check whether testing requirements are clear and whether each team assigned someone to Integration team to test its requirements
2. The following use cases/functional requirements were reviewed:
 - a. BBS
 - b. Scaling
 - c. 5G. We will check per each requirement if there is sufficient coverage
 - d. CCVPN. Team will double check regarding the resources assigned to testing

Yang will also attend our call next week.

Change management, Edge Automation, Consistent Id of the Cloud Region, HPA, K8 based cloud region use cases/ functional requirements owners – please attend to synchronize with the Integration team.

Best regards, Alla
