

# LOG Meeting Minutes 2019-02-19

Meeting at 1100 EST Tue - <https://zoom.us/j/519971638>

<https://lists.onap.org/g/onap-discuss/topics>

<http://onap-integration.eastus.cloudapp.azure.com:3000/group/onap-integration>

<https://jira.onap.org/secure/RapidBoard.jspa?rapidView=143&view=planning.nodetail&epics=visible>

## Agenda

- Michael started parallel full time ONAP related DevOps position - should discuss impact on logging/pomba project
  - Notice to onap: [https://lists.onap.org/g/onap-discuss/topic/michael\\_reduced\\_availability/29918628?p=,,20,0,0,0::recentpostdate%2Fsticky,,20,2,0,29918628](https://lists.onap.org/g/onap-discuss/topic/michael_reduced_availability/29918628?p=,,20,0,0,0::recentpostdate%2Fsticky,,20,2,0,29918628)

Team,

I have taken on a full time DevOps kubernetes based role last week directly related to ONAP that may cause less focus on public in the short term and includes 20% travel.

We can discuss this in the affected meetings.

I have more than a couple pending mails to answer – sorry for the de-focus the last 2 weeks.

I am still working out the details of working privately and publicly – as I was previously 100% public – the team I work with on DevOps is very open to the idea of continuing the LOG and CD work – as there is also opportunity for up-sourcing as both sides are ONAP focused and the role is in support of production ONAP deployment.

So just a heads up

- Any committer can run for the PTL role - it is a short 2 phase process - 3 days for who runs - on onap-discuss - then 3 days for committers to vote

- Prep for M2 this thursday - [Logging Dublin M2 Deliverables for Functionality Freeze Milestone Checklist](#)

- TSC-25 ramping down - CD work

- Continue coding changes for spec - casablanca spec is implemented in Dublin
  - For example any change to the spec now is in el-alto
  - coding: portal/sdk - see ongoing for portal in

 [PORTAL-348](#) - Investigate/Run/Use/Modify Portal/SDC Logging library to align with Spec CLOSED

- fix up <https://gerrit.onap.org/r/#/c/62405/>

- still need to look at SO and AAI log libraries for comparison

- Answer pending questions-mails

- Review opentracing/zipkin  [LOG-104](#) - Investigate Jaeger / opentracing / zipkin distributed tracing agent/server CLOSED

- [Lorraine Welch](#) System.out standardout - review in terms of not using a hardcoded file appender - in terms of syslogs
  - see <https://12factor.net/logs>

- Discussion: DCASE logs
  - log formatting questions - the 4 types of logs per microservice -
  - Discuss: Acumos single log discussion - MARKERs to replace log file name key - optional for ONAP for now - TODO verify our spec

## Attendees

[Prudence Au](#)

[Lorraine Welch](#)

[Luke Parker](#)

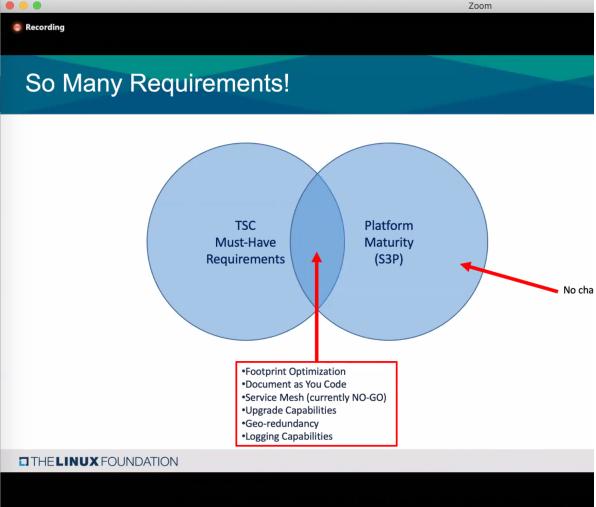

## Items

- Plan for
  - current implementation
  - Future spec for el-alto for VNFs below
- this week...
  - logging work
    - Dev environment back up - merging existing library - using vid-app-common as a template for usage of org.onap.portal.sdk
      - <epsdk.version>2.4.0</epsdk.version>
    - prepping for splitting repos - 1 per component - will need 8+
    - working with dmaap on charts and filebeat
    - pylog issues for vfc are transient LF issues - posting response (with multicloud)
    - release notes

- scorecard for S3P
  - dcaege2 work in  [DCAEGEN2-1166](#) - PM Mapper Logging compliance for current codebase CLOSED under <https://gerrit.onap.org/r/#/c/77910/>
  - questions on logging format onap-discuss including hv-ves I need to address <https://lists.onap.org/g/onap-discuss/message/14997?p=,,20,0,0::Created,,log,20,2,20,29162034>
    - Discussion on VNF logs (CLAMP) @Sanjay - with Alok Gupta
    - vnf behaviors on top of vnf events
    - dmaap TCA like events - look into capturing these
    - ?add our own log tracing when VNFS react to events - another tracing EPIC we should look at
      - both for VES and non-VES format
      - There is a gap in tracing VNF behaviour - via 5G RAN -
      - cloud infrastructure logs - vm, k8s and cloud service logs (beyond the vm level) - CNI cloud-native plugins example
      - need to think more about combining the logs - at the same time as we currently just capture them.
      - Provide log requirements to VNF onboarding team.
      - **Spondon Dey** - feeding in to CL, policy - scaling behaviour - onap to drive more
  - infrastructure work
    - Helm ownership -
    - CI/CD - going with Orange MQ robot for oom merges
    - Perf and mostly crashloop avoidance
    - Deploy changes for RHEL7.6
    - Deploy order work
      - ARM A1 testing of new containers from dockerhub on AWS
        - 80g/vm images - reducing footprint, standard alpine java image, ARM/i64 compat
      - Nodeports for dmaap
      - Datalake (now part of DCAE) does not yet affect us but it will -
    - ONS April conference prep work
      - The rest of our backlog is still in progress - M2 is coming up on the 14th
  - last week....
  - get committed resources for the next 2 months M2 to RC0 - so we can state what is in and out of the Dublin release 9 weeks to april 4th
    - M2 - functionality freeze - 21 Feb
    - M4 - April 4th
 

I have taken the liberty of adding some names - feel free to add your availability or edit this section - we will paraphrase it in the M1 report - [Logging Dublin M1 Release Planning](#)
    - **Michael O'Brien** - 50% direct Logging work - really 40% dev/devops + 10% PTL/TSC/Project - the rest = related ONAP, CD, Doc, OOM, conference/customer.
      - Todo lowered?
    - **Prudence Au** - doing half of the PTL work, template, meets, reviews - especially POMBA with [James MacNider](#) on reviews - representing on most Thu POMBA meets
    - **Avdhut Khokhar** - thank you for all the commit reviews
    - **Luke Parker** - co-PTL and reference code
    - Sanjay - TODO: % of work on the project
  - Meeting at 1200 EST today on ARM docker images (affecting LOG images as we need to get the ARM layer into the image - wrap the dockerhub versions)
  [LOG-334](#) - Oneclick Kubernetes install for ARM processor backed A1 AWS VMs CLOSED
  - Stop using "latest" for any image - lock down the version tag for testing stability - see our use of busybox
- [LOG-949](#) - Change busybox image tag from latest to specific version 1.30.0 for integration stability CLOSED
- Good news: We passed M1 last Thu
  - Dublin scope finalized for M1
 

[Release Planning#DublinReleaseCalendar](#)  
[Logging Dublin Scope](#)
  - New work for dublin
    - Assist in 5G edge work via OOM/AWS work - meet is at 1100 EST Wed with [ramki krishnan](#)'s team
    - plus metric capture via Prometheus - [LOG-911](#) - Add Prometheus charts for kubernetes metric streaming into the LOG ELK stack CLOSED
  - [LOG-707](#) - Logging El-Alto (moved from) Dublin Scope CLOSED
- Review/consolidate JIRAs
  - opentrace - will try to get in by april - an LF project
  - priority list
    - infrastructure - filebeat sidecars (before DaemonSet refactor) - see [Log Streaming Compliance and API](#)
    - format - via library - portal/sdk - minimal retrofit for markers/mdcs - [LOG-600](#) - Align with Portal/SDK logging library - investigate/run/modify to comply with MDC spec CLOSED
  - all s3p - security, perf (aa-log-3\*\*) - scaling - run with 1 logstash
  - Logstash used to be a Daemonset - however the filebeat needs to a daemonset - instead of each sidecar - 1 container per vm - get story
  - Additional tools - get POC for each - determine which goes to production level
    - prometheus - requires coordination with oom and multicloud
    - log checker - pending
  - opentracing - us -  [LOG-104](#) - Investigate Jaeger / opentracing / zipkin distributed tracing agent/server CLOSED
  - search guard - us
