    - (also review from 2 weeks ago - [Lorraine Welch](#) System.out standardout - review in terms of not using a hardcoded file appender - in terms of syslogs
    - see <https://12factor.net/logs>
    - log retention on pod failure - those not mapped to PVs - including the current EmptyDir link between the sidecar - etherial PV - logs only end up in the elk stack
