

Details of Targeted Service Template

In CCVPN use case , we have 3 kinds of service: SD-WAN Service, SOTN Service, SD-WAN and SOTN combined Service.

Here we take SD-WAN Service template as an example. we want to create multiple resources in one service like multiple sites.

Please find [Detail of Targeted Service Template.ppt](#) for more information.

To check the targeted service template, please click here: [Targeted service template .csar](#)
