

# Use Case Realization Call: May 8, 2019

## Date

08 May 2019

## Attendees

- Benjamin Cheung
- Enbo Wang
- Oskar Malm
- Floyd Goldstein
- Zu Qiang (Ericsson)
- Joanne Liu Rudel
- James Forsyth
- Pavel Paroulek
- Keong Lim
- Sirisha Gopigiri
- Tracy Van Brakle
- Min Sang Yoon
- Rishi Tandon
- yaoguang wang

## Goals

### Table of Key Presentations/Overviews

Date	Presentation	Presenter	Description, Recording
Apr 10, 2019	Controller LCM API Evolution	Oskar Malm	<ul style="list-style-type: none"><li>• Target is common LCM API in CCSDK usable by different controller personas to simplify for both clients and controller implementations</li><li>• Support PNFs for applicable LCM operations in a consistent way</li><li>• Enable use of CDS blueprint processor to customize behavior of LCM operations in the 'self-service' category<ul style="list-style-type: none"><li>◦ In ONAP R4, CDS can be used for pre/post-instantiation configuration. Generic and model-driven design should allow CDS usage to be extended for additional operations and use cases.</li></ul></li><li>• Evolution steps that preserve backwards compatibility for clients</li></ul> <a href="https://wiki.onap.org/download/attachments/50202249/2019-04-09%20ONAP_LCM_API_Evolution_El_Alto.pptx?api=v2">https://wiki.onap.org/download/attachments/50202249/2019-04-09%20ONAP_LCM_API_Evolution_El_Alto.pptx?api=v2</a>
May 1, 2019	A&AI GraphGraph Visualizer	Pavel Paroulek	Visualizer for A&AI Model Layout <a href="#">Use Case Realization Call: May 1, 2019</a>
May 8, 2019	A&AI Model Browser, Sparky	James Forsyth	A&AI developer Model Browser to navigate and viewing attributes, object types & edge view
May 15, 2019	Edge Automation Overview	ramki Krishnan	
May 22, 2019	IoT Creation Overview	Atul Purohit	
			Sparky - Run Time A&AI Browser

## Discussion items

Time	Item	Who	Notes
	Business Drivers	Benjamin Cheung	<p>Discussion of Business Imperatives added to Use Case Pages</p> <p>From U/C S/C call on Monday May 6</p> <p>See example from PNF PNP and PNF Pre-onboarding/onboarding</p> <p>5G - PNF Plug and Play</p> <p>PNF/VNF PREONBOARDING / ONBOARDING in R6 Frankfurt</p>

R5 EI Alto Cadenc e Releas e Propos al  (EUAG / End-User Adviso r y Group)	Be nja min Ch eu ng	<a href="https://wiki.lfnetworking.org/display/LN/EUAG+2019-04-09+meeting+minutes">https://wiki.lfnetworking.org/display/LN/EUAG+2019-04-09+meeting+minutes</a>  Summary: The R5 EI Alto release could be shortened and focus on internal (tech) debt and defect backlogs. A proposed release cycle is presented.  Apr 18, TSC called a Vote for resolution of R5 release  Apr 29 Vote resolved R5 = Maintenance Release
R4 /Dublin (RC0)  May 2, 2019	Be nja min Ch eu ng	Release Candidate 0 - End 2 End Release Test Cases and End 2 End functional Test Cases. Project Team focused its effort on:  1. <b>TESTING</b> - integration testing (complete Health Check and Pair Wise Testing) 2. <b>DEFECTS</b> - closing high priority defects 3. <b>DOCS</b> - supporting Documentation team  <a href="#">R4 Dublin Release Planning Wiki: Release Planning</a>  <a href="#">Score Card: M4 Dublin Release Requirements</a>
PLATF ORM TOPIC S:  Controll er to NF Associa tion	Be nja min Ch eu ng	R5/R6 Topic  See Slides Nov 6, 2018. Development of Controller to NF assignment association S/W.  <a href="#">USE CASE REALIZATION MEETING (Notes 2018-11-6) Ctrl-NF</a>
PLATF ORM TOPIC S:  Data Persist ency	N. K. Sh ank ara nar aya nan	STATUS: Work for ConfigDB completed, not merged in R4  Dan Timoney moved to R5, one Jira for ConfigDB. One issue about merging.  ONAP code added can take a test ONAP deployment to have the ConfigDB work.  <a href="#">USE CASE REALIZATION MEETING (Notes 2019-01-30) U/C Cross-Interaction, Persistency</a>
PLATF ORM TOPIC S:  Controll er LCM API Evoluti on	Osi kar Malm	<a href="https://wiki.onap.org/download/attachments/50202249/2019-04-09%20ONAP_LCM_API_Evolution_EI_Alto.pptx?api=v2">https://wiki.onap.org/download/attachments/50202249/2019-04-09%20ONAP_LCM_API_Evolution_EI_Alto.pptx?api=v2</a>  Goals (Architecture Evolution) <ul style="list-style-type: none"><li>• Target is common LCM API in CCSDK usable by different controller personas to simplify for both clients and controller implementations</li><li>• Support PNFs for applicable LCM operations in a consistent way</li><li>• Enable use of CDS blueprint processor to customize behavior of LCM operations in the 'self-service' category<ul style="list-style-type: none"><li>◦ In ONAP R4, CDS can be used for pre/post-instantiation configuration. Generic and model-driven design should allow CDS usage to be extended for additional operations and use cases.</li></ul></li><li>• Evolution steps that preserve backwards compatibility for clients</li></ul> Present at the Arch S/C Apr 9 (Tue) second presentation.
USE CASES:  BBS U /C Evoluti on	Da vid Per ez Ca par ros  Tim Car ey  Ch ake r Al -Ha kim	BBS Evolution - Slide set linked in R6 proposed U/C. List of proposals & functional requirements.  1. Change Service - want to use ONAP platform. 2. Full Closed Loop for Fault Management - CLAMP. 3. Service Update API (SO) - will be developed  <a href="https://wiki.onap.org/download/attachments/60887504/BBS_R5_v1.pptx?version=1&amp;modificationDate=1554180715000&amp;api=v2">https://wiki.onap.org/download/attachments/60887504/BBS_R5_v1.pptx?version=1&amp;modificationDate=1554180715000&amp;api=v2</a>
USE CASES /5G:  PM Diction ary/FM MD GUI	Ma rge Hillis	FM META DATA & PM DICTIONARY in R5

	USE CASES /5G: Preonboarding /Onboarding	Be nja min Ch eu ng Zu Qia ng (Eri ccss on) Mic hel a Be vil a cqua	PNF PREONBOARDING / ONBOARDING in R5
	USE CASES: Splitting up PNF & 5G U /Cs	Be nja min Ch eu ng	<p>R5 EI Alto Use Case Page:</p> <p><a href="#">Release 5 (EI Alto) proposed use cases and functional requirements</a></p> <p>A new General PNF Use Case Page was created</p> <p><a href="https://wiki.onap.org/pages/resumedraft.action?draftId=60892496&amp;draftShareId=8c48e706-ad4f-464d-84a9-273af806571f">https://wiki.onap.org/pages/resumedraft.action?draftId=60892496&amp;draftShareId=8c48e706-ad4f-464d-84a9-273af806571f</a></p> <p>Alla will discuss creating new pages for</p> <p>Mobile Service Chaining (KDDI): <a href="#">MOBILE SERVICE CHAINING</a></p> <p>IoT Service Creation</p>
	USE CASES: Modeling gNB /5G RAN	Thi nh Ng ue np hu Be nja min Ch eu ng	<p>Align, harmonize, reconcile various information models to ONAP model:</p> <p>Expand &amp; verify model and harmonize with the ONAP internal information &amp; data model:</p> <p><a href="#">ETSI SOL001 ... 007 with ONAP internal Model</a></p> <p>PNFD modeling (Model S/C)</p> <p>5G Model (<a href="#">3GPP</a>)</p> <p><b>ORAN (WGs)</b></p> <p>Open ROADM (reconfig optical add/drop multiplexer)</p> <p>ONF</p> <p><b>ISOMII</b></p> <p>OTCC (Optical transport config &amp; control)</p> <ul style="list-style-type: none"> <li>- Use Cases that need transport models need some model consistency.</li> <li>- Try a Use Case with extended ONAP model &amp; real equipment.</li> </ul> <p>Follow-up Call Tue Apr 30, 2019</p>
	Arch S /C PNF POB /OB Flow	Be nja min Ch eu ng	<p>Arch S/C Information Flows:</p> <p><a href="#">Draft ONAP Information Flows</a></p> <p>New Information flow for Preonboarding/Onboarding xNF packages/resources.</p> <p><a href="#">ARCHCOM: InfoFlow - Onboard Resource into SDC Flow</a></p>
	A&AI - Model Browser	Ja me s For syth	<p>Modeling S/C decompose the A&amp;AI data model</p> <p>A&amp;AI developer Model Browser (Interface Jimmy wrote to navigate viewing object types &amp; edge view - releasing attributes) complementary to GraphGraph (visualizing layout).</p> <p>UML show relationships between objects in the OXM. If you take the relationship list object (java type) end up with connections to everything else. An overwhelming diagram that it is too much to absorb. Can't see it or visualize it, too big and too much stuff to be useful. In A&amp;AI team a way to present the data a view of the schema and edge rules (vertex types) in the graph modeled as java-types in OXM to give a mapping to allow you to look at it w/o having to look at all the ways it is connected together. As that's the challenge in A&amp;AI w/ 15k endpoints when you map 15k on a screen it is too much. Shows containment, edges and ability to dig into the properties assigned on each Javatype.</p> <p>Model Browser - Questions about Schema, go to CGI easier to look at attributes what's searchable, indexed, key, describing a vertex that in the schema &amp; edge rules but hard to see it. text representation of the vertex and attributes. consolidated view and to/from.</p> <p>Sparky the Run-Time Browser</p>

NEXT / UPCO MING Present ation (Mid-May)  Edge Deploy ment	ra mki kris hn an	Ramki will be presenting on Edge Deployments in upcoming meetings (contacted)  Mid-May after Arch presentation
IoT Service Creation	Atu l Pur ohit	IoT Create Services on 5G  <a href="#">5G Use Cases in R6 Frankfurt</a>  May 22, 2019
O-RAN Modeli ng & alignm ent with ONAP	Tra cy Va n Bra kle	work with Open RAN alliance availability of 3GPP baseline (that vendor & operators agreed upon) add to ONAPs information model and expand existing management I/F for CM management.  want to plug them into ONAP and facilitate the 5G and other use cases working these open I/F specifications. For EI Alto WG-1,3,6. Configuration management NetConf YANG specification derived from info model aligned w/ 3GPP RM & existing 3GPP info-model. Papyrus. Which 5G U/C good candidates verification w/ evolving model. PNF PnP/OOF?  Near Real Time RIC. WG-4 open Front Haul.  In PCI/SON U/C - the SDN-R Interaction w/ RAN simulator is Netconf/YANG based. In R5 we could see what parts of the model would come from ORAN.  Attributes similar with LTE. 5G Architecture evolution.
OOF /PCI	N. K. Sh ank aran aya nan	PoC U/C will happen in WinLab. to meet time lines do those parts in Windriver focusing on DCAE, Policy and OOF.  Code still need to be integrated. Jira SDN-C (Dan Timoney) pushed EI Alto (the Maintenance Release).
