New Features/Usecases

No#	JIRA	Driver	Platform /Service	Details	Impacted Component	Requested By	Commit (Y/N)
1		Security	Platform	Platform support for using client identify for topic/feed provisioning request via DBCL. Comment from Dominic/DBCL specifying the client identity is simpler and more granular, but the automatic creation of the AAF Role results in more Roles overall. It avoids the need for pre-provisioning of the Role (manual step currently)	cli spec, blueprint-gen, Dmaap Plugin	Joseph O'Leary	
2		Security	Platform	Cloudify Version upgrade (4.6 rls last month, 5.0 in-progress) - dependent on python 2.x EOL	Cloudify, bootstrap, plugins	Vijay Venkatesh Kumar	
3	DCAEGEN2-917	Security/ CL	Both	AAF Integration - Dynamic certificate generation - Dependent on El-Alto AAF work (to be checked with Jonathan)			
4		S3P	Platform	ONAP Release upgrade feature for DCAE (S3P)			
5		S3P	Both	Deployment support for stateful set components. Cloudify blueprint should support the Statefulset deployment for multi replica set (scaling)	Service component + K8s plugin + BP-gen + spec		
6	DCAEGEN2-1179		Platform	Platform support for Kafka topic provisioning/distribution	Platform (DBCL, DMaap)		
7			Services	VES Onboarding yaml registration binding with PM-Mapper configuration	SDC/DCAE-DS, DCAE Services		
8			Services	VES o/p from PM-Mapper feeding into analytics services (this may be done based on DDF demo - To be confirmed with Ericsson team)			
9			Platform	Support Tiller clusterIP/port as option instead of nodeport alone for tiller.	Helm plugin	Vijay Venkatesh Kumar	
10			Both	Align python component build process with ONAP LF		Vijay Venkatesh Kumar	
11	DCAEGEN2-1643	CL	Both	Component spec updates	dcae_cli, bp-gen, k8s plugin, service components	Vijay Venkatesh Kumar	
		CL		Policy update flow notification support	PolicyHandler, bp-gen		
		CL		Policy Model generation (Self-serve control loop extension)	bp-gen		
				DCAE MS configuration based on external/inventory updates - OTI	Platform
