## START RECORDING

1	New support ticketing for LF	James Forsyth	support.linuxfoundation.org
2	Dublin Issue	Renee I Rogers	sparky-be expired certificate - status  James Forsyth will add note to known issues using info provided by Renee Rogers and Francis Paquette and make sure dublin docs branch is synced <input type="checkbox"/> <a href="#">AAI-2489</a> - Update sparky AAF certificate <span style="border: 1px solid #ccc; padding: 2px;">CLOSED</span> <input checked="" type="checkbox"/> <a href="#">DOC-486</a> - Dublin release notes on readthedocs is not updated to latest version for dublin <span style="border: 1px solid #ccc; padding: 2px;">CLOSED</span> - opened because the docs are not syncing even though dublin matches master  <input type="checkbox"/> Francis Paquette will work <input checked="" type="checkbox"/> <a href="#">AAI-2490</a> - [sparky-be] Update certificate for El Alto <span style="border: 1px solid #ccc; padding: 2px;">CLOSED</span>
3	Dublin Issue		<input checked="" type="checkbox"/> <a href="#">PORTAL-596</a> - Portal can't launch AAI - url uses fqdn that does not match ssl certificate allowed names <span style="border: 1px solid #ccc; padding: 2px;">CLOSED</span> - In future, AAI team needs to open Jira bugs against systems that are misconfigured or missing data when we become aware of the issue.
4	DSL documentation page	Keong Lim	The new DSL documentation page looks good: <a href="#">DSL API (BYOQ - Bring Your Own Query)</a> but it contains some links to internal att.com. Keong Lim the initial doc did, but I cleaned them up, can you point to the spots I missed? - Jimmy  James Forsyth I still see it in: "AID page", related-link in "resource" format example, url in resource_and_url example, simple example, syntax example. Aha - the hyperlinks didn't update.  Looking forward to further discussion and experimentation!

Need documentation which will describe how the microservices are connected, which repos support which functions, etc. Pavel Paroulek says that he had to reverse engineer the dependencies to see how the repos are connected. Recommended to focus on the resources repo for understanding the core function of AAI.  (bumped up, is it still relevant?)
