

# Jira How to?

The purpose of this page is to provide a step by step procedure to use Scrum within Jira.

[blocked URL](#)

Anyone who has a valid [LFID](#) can submit a [JIRA Issue](#).

It is assumed that the readers has familiarized himself with:

- the [JIRA Workflow and Practices](#) : explain Jira terminology, workflow, and the expected information to describe an issue.
- the [Scrum Framework](#) : explain the importance of Scrum along with the roles, the ceremonies and the artifacts

The links below are procedures that dive deeper to address everyday usage of Jira.

- [Create a Backlog Item](#)
  - [Difference between a Product and Sprint Backlog](#)
  - [Epic, Story, Task and Bugs](#)
- [Create a Release](#)
- [Create a Sprint](#)
- [Edit a Backlog Item](#)
- [Estimate a Backlog item](#)
- [Prioritize a Backlog item](#)
- [Start a Sprint](#)
- [Track Progress](#)
- [Work in a Sprint](#)
